Chapter 1. Introduction	1
Acknowledgments	6
Chapter 2. The $m$ -Stieltjes–Rogers and $m$ -Thron–Rogers polynomials	7
2.1. Dyck paths	7
2.2. Schröder paths	9
2.3. $m$ -Dyck paths	12
2.4. $m$ -Schröder paths	15
2.5. Some further remarks	18
Chapter 3. Relation between different values of $m$	21
Chapter 4. The $m$ -Jacobi–Rogers polynomials	23
Chapter 5. The generalized $m$ -Stieltjes–Rogers, $m$ -Thron–Rogers and $m$ -Jacobi–Rogers polynomials	25
Chapter 6. Generalized $m$ -Jacobi–Rogers polynomials in terms of ordered trees and forests	29
Chapter 7. Contraction formulae for $m$ -branched continued fractions	33
7.1. Generalization of even contraction	33
7.2. Generalization of odd contraction	36
Chapter 8. Production matrices	39
8.1. General theory of production matrices	39
8.2. Production matrices for generalized $m$ -Stieltjes–Rogers, $m$ -Thron–Rogers and $m$ -Jacobi–Rogers polynomials	40
Chapter 9. Total positivity	43
9.1. Preliminaries concerning partially ordered commutative rings and total positivity	43
9.2. Production matrices and total positivity	44
9.3. Statement of results for $m$ -Stieltjes–Rogers, $m$ -Thron–Rogers and $m$ -Jacobi–Rogers polynomials	46
9.4. Combinatorial proofs using the Lindström–Gessel–Viennot lemma	48
9.5. Algebraic proofs using production matrices	53
Chapter 10. Weights periodic of period $m+1$ or $m$	55
10.1. Period $m+1$ : Solving the recurrence	56
10.2. Period $m$ : Solving the recurrence	61

10.3.	Combinatorial interpretations of the multivariate Fuss–Narayana polynomials	64
10.4.	Period $m+1$ : Production-matrix method	70
10.5.	Period $m+1$ : Row-generating polynomials	73
Chapter 11.	Weights eventually periodic of period $m+1$ or $m$	77
11.1.	Period $m+1$	77
11.2.	Period $m$	78
Chapter 12.	Weights quasi-affine or factorized of period $m+1$ or $m$	81
12.1.	Multifactorials	83
12.2.	Period $m+1$ : Increasing $(m+1)$ -ary trees	85
12.3.	Period $m$ : Increasing multi- $m$ -ary trees	102
12.4.	A final observation	111
12.5.	Stirling permutations and $r$ th-order Eulerian polynomials	112
Chapter 13.	Ratios of contiguous hypergeometric series I: ${}_{m+1}F_0$	117
Chapter 14.	Ratios of contiguous hypergeometric series II: ${}_rF_s$	123
14.1.	Three-term contiguous relations for general ${}_rF_s$	124
14.2.	Branched continued fraction for first ratio of contiguous ${}_{m+1}F_m$	124
14.3.	Branched continued fraction for first ratio of contiguous ${}_rF_s$ for general $r, s$	126
14.4.	Branched continued fraction for second ratio of contiguous ${}_{m+1}F_m$	129
14.5.	Branched continued fraction for second ratio of contiguous ${}_rF_s$ for general $r, s$	131
14.6.	Branched continued fraction for third ratio of contiguous ${}_0F_m$	133
14.7.	Branched continued fraction for third ratio of contiguous ${}_mF_m$	135
14.8.	Branched continued fraction for third ratio of contiguous ${}_rF_s$ for general $r, s$	136
Chapter 16.	Ratios of contiguous hypergeometric series III: ${}_r\phi_s$	141
16.1.	Branched continued fraction for ratio of contiguous ${}_{m+1}\phi_m$	142
Chapter 16.	Some final remarks	143
16.1.	A conjecture on higher-order Genocchi numbers and Gandhi polynomials	143
16.2.	Limitations of our method	144
Bibliography		147
