

Contents

Chapter 1. Introduction	1
Acknowledgments	4
Chapter 2. Anchored vector bundles over presymplectic manifolds	5
2.1. A review of presymplectic geometry	5
2.2. A hierarchy of compatibility conditions	6
Chapter 3. Compatibility via connections	13
3.1. A brief review of connections	13
3.2. Induced connections	15
3.3. Connections and the compatibility conditions	16
Chapter 4. Momentum sections for presymplectically anchored Lie algebroids	19
4.1. Momentum sections	19
4.2. Bracket-compatible momentum sections	21
Chapter 5. The zero momentum locus of a hamiltonian Lie algebroid	25
5.1. Bracket-compatibility in terms of torsion	25
5.2. The zero locus of a bracket-compatible momentum section	26
Chapter 6. Examples	29
6.1. Lie algebra bundles	29
6.2. Tangent bundles of presymplectic manifolds	29
6.3. Regular foliations	37
6.4. Lie algebroids of rank 1	40
Chapter 7. The category of hamiltonian Lie algebroids	41
7.1. Lie algebroid with a connection in terms of derivations	42
7.2. Morphisms of anchored vector bundles with connections	45
7.3. Morphisms of hamiltonian Lie algebroids	47
7.4. Quotient by the isotropy subbundle	49
7.5. Application to transitive Lie algebroids	54
Chapter 8. Reduction of action Lie groupoids and algebroids	57
8.1. Quotient of an action groupoid by a subgroup	57
8.2. Examples	59
8.3. Morita equivalence	61
8.4. The quotient groupoid in a local trivialization	62
8.5. Lie algebroid of the quotient groupoid	63
Chapter 9. Hamiltonian structures on the reduced Lie algebroid	69
9.1. Connections on the reduced Lie algebroid	69

9.2. Pullback of the hamiltonian structure on the reduced Lie algebroid	71
Chapter 10. Cohomological interpretation of hamiltonian Lie algebroids	73
10.1. Generalization of equivariant cohomology models to Lie algebroids	74
10.2. The basic subcomplex of the Weil algebra	75
10.3. Statement of the main theorem	77
10.4. The Cartan calculi	77
10.5. Local bigraded coordinates	79
10.6. Parallel projection of derivations	81
10.7. The horizontal subalgebra	82
10.8. Relation to the bigraded algebra of Chapter 7	83
10.9. Some technical lemmas	84
10.10. Proof of Theorem 10.8	85
Chapter 11. Open questions, conjectures, outlook	89
11.1. Hamiltonian foliations	89
11.2. Obstruction theory	89
11.3. The Poisson case	90
11.4. Hamiltonian Lie groupoids	91
11.5. Structure theory of reduced action groupoids	92
Chapter 12. Related work	95
Bibliography	97
