

Contents

Chapter 1. Introduction	1
1.1. Notation	6
Chapter 2. Strong stability analysis for solutions of SDEs	9
2.1. Setting	9
2.2. Exponential integrability bounds for solutions of SDEs	9
2.3. An identity for Lyapunov-type functions	14
2.4. Two solution approach	18
Chapter 3. Strong completeness of SDEs	37
3.1. Theorems of Kolmogorov-Chentsov type	37
3.2. Theorems on strong completeness of SDEs	44
3.3. Strong completeness for SDEs with additive noise	46
Chapter 4. Examples of SODEs	51
4.1. Setting	51
4.2. Stochastic van der Pol oscillator	51
4.3. Stochastic Duffing-van der Pol oscillator	53
4.4. Stochastic Lorenz equation with additive noise	56
4.5. Langevin dynamics	58
4.6. Brownian dynamics (Over-damped Langevin dynamics)	59
4.7. Stochastic SIR model	60
4.8. Experimental psychology model	62
4.9. Stochastic Brusselator in the well-stirred case	64
4.10. Stochastic volatility processes and interest rate models (CIR, Ait-Sahalia, 3/2-model)	65
4.11. Wright-Fisher diffusion and Jacobi processes	71
Chapter 5. Examples of SPDEs	75
5.1. Setting	75
5.2. Stochastic Burgers equation with a globally bounded diffusion coefficient and trace class noise	76
5.3. Cahn-Hilliard Cook equation with trace class noise	78
5.4. Non-linear wave equation	83
Acknowledgments	86
Bibliography	87
