Chapter 1. Introduction	1
1.1. The main result	4
1.2. Necessary conditions	6
1.3. An application to maximal functions	7
1.4. Fourier multipliers	9
1.5. Application to weighted norm inequalities	11
1.6. Organization and notation	11
Acknowledgments	13
Chapter 2. Necessary Conditions	15
2.1. The local integrability hypothesis	16
2.2. The reflexivity hypothesis	19
Chapter 3. Single scale sparse domination	23
3.1. A single scale estimate	23
3.2. A resolution of the identity	24
3.3. Single scale regularity	24
Chapter 4. Proof of the main result	29
4.1. A modified version of sparse forms	29
4.2. Proof of the main theorem given the inductive claim	30
4.3. Proof of the corollary of the main theorem	31
4.4. The inductive step	32
Chapter 5. Maximal operators, square functions and long variations	43
5.1. Maximal functions and ℓ^r -variants	43
5.2. Variation norms	45
5.3. Truncations of sums	46
5.4. Some simplifications for maximal operators	48
Chapter 6. Fourier multipliers	51
6.1. The main multiplier theorem	51
6.2. A result involving localizations of Fourier multipliers	53
6.3. Proof of the main multiplier theorem	54
Chapter 7. Sample applications	59
7.1. Operators generated by compactly supported distributions	59
7.1.1. Maximal functions	59
7.1.2. Variational operators	61

7.1.3. Lacunary maximal functions for convolutions associated with the wave equation	63
7.2. General classes of multipliers	64
7.2.1. Miyachi classes and subdyadic Hörmander conditions	66
7.2.2. Multiscale variants of oscillatory multipliers	68
7.3. Prototypical versions of singular Radon transforms	71
7.3.1. An approach via Fourier multipliers	72
7.4. Densities on spheres: Maximal singular integrals	73
7.5. On radial Fourier multipliers	76
7.6. Stein's square function	78
7.6.1. The case $1 < p \leq 2$	78
7.6.2. The case $2 < p < \infty$	80
Appendix A. Facts about sparse domination	81
A.1. Replacing simple functions	81
A.2. The Hardy–Littlewood maximal function	82
A.3. Operators associated with dilates of Schwartz functions	83
Appendix B. Sparse domination: Cases where $p = 1$ or $q = \infty$	85
B.1. The case $p = 1, q < \infty$	85
B.2. The case $p > 1, q = \infty$	87
B.3. The case $p = 1$ and $q = \infty$	92
Appendix C. Facts about fourier multipliers	95
C.1. Multiplication by smooth symbols	96
C.2. Independence of ϕ, Ψ in the finiteness of $\mathcal{B}[m]$	96
Bibliography	99
