

Contents

Chapter 1. Introduction	1
1.1. Statement of main results	1
1.2. Notation	11
1.3. Weights and module structure	14
1.4. Unipotent classes	17
1.5. Preliminary results	25
Chapter 2. Triples having TGS	31
2.1. Conditions implying TGS	31
2.2. Criteria involving bounds for codimensions	36
2.3. Relevant subsystems and dominant weights	39
2.4. Exclusion of triples	44
2.5. Weight string analysis	51
2.6. Further analysis	70
2.7. The triples $(C_4, \omega_3, 3)$ and $(B_2, \omega_1 + \omega_2, 5)$	90
2.8. Tensor products	96
Chapter 3. Quadruples having TGS	109
3.1. Preliminary results on tuples	109
3.2. Reduction of quadruples requiring consideration	113
3.3. Analysis of individual cases	114
3.4. Analysis of infinite families	147
Chapter 4. Methods for treating cases not having TGS	165
4.1. Localization to a subvariety	165
4.2. Semisimple automorphisms	167
4.3. Use of Lie algebra annihilators	173
4.4. Invariants	174
4.5. Generalized height functions	175
4.6. Reduction from higher Grassmannian varieties	178
Chapter 5. Triples and first quadruples not having TGS	181
5.1. Large triples and associated first quadruples	181
5.2. Small triples and associated first quadruples	200
Chapter 6. Higher quadruples not having TGS	231
6.1. Large higher quadruples	231
6.2. Small higher quadruples	254
Bibliography	301
