

Contents

| | |
|---|-----|
| Chapter 1. Introduction | 1 |
| 1.1. Motivating problems from transcendence | 1 |
| 1.2. Anderson's exponentiation theorem | 6 |
| 1.3. The de Rham module and rigid analytic trivializations | 8 |
| 1.4. Hyperderivatives of fundamental quantities | 11 |
| Chapter 2. Preliminaries | 15 |
| 2.1. Notation | 15 |
| 2.2. Anderson t -modules | 17 |
| 2.3. t -motives and dual t -motives | 18 |
| 2.4. Hyperderivatives and hyperdifferential operators | 20 |
| Chapter 3. Exponentiation and rigid analytic trivializations | 23 |
| 3.1. From dual t -motives to t -modules | 23 |
| 3.2. t -frames | 24 |
| 3.3. Exponentiation via division towers | 25 |
| 3.4. Exponentiation via Frobenius difference equations | 26 |
| 3.5. Calculation of \mathcal{E}_0 and examples | 28 |
| Chapter 4. Biderivations and quasi-periodic extensions | 37 |
| 4.1. Biderivations for t -modules and quasi-periodic functions | 37 |
| 4.2. Anderson generating functions | 42 |
| 4.3. The de Rham pairing | 46 |
| 4.4. Rigid analytic trivializations, quasi-periods, and quasi-logarithms | 49 |
| 4.5. Periods and logarithms for almost strictly pure t -modules | 55 |
| 4.6. Examples | 61 |
| Chapter 5. Hyperderivatives of periods, quasi-periods, logarithms, and quasi-logarithms | 75 |
| 5.1. Hyperderivative t -modules of Brownawell and Denis | 75 |
| 5.2. Prolongations of t -motives, dual t -motives, and Anderson t -modules | 80 |
| 5.3. Hyperderivatives of logarithms and quasi-logarithms via prolongations | 86 |
| 5.4. Quasi-periodic extensions of prolongations of t -modules | 99 |
| 5.5. Examples | 111 |
| Bibliography | 117 |
