Contents

Chapter 1. Introduction 1
1.1. The KPZ universality class 1
1.2. The directed landscape 2
1.3. Two perspectives on last passage percolation 4
1.4. Brownian LPP and the extended Airy sheet 6
1.5. The full scaling limit of multi-point Brownian LPP 8
1.6. Consequences 10
1.7. More related work 11
1.8. Outline of the paper and a primer about the proofs 12
Acknowledgments 14

Chapter 2. Last passage percolation across lines 15
2.1. Last passage with multiple paths 16
2.2. Basic properties of disjoint optimizers and last passage values 17
2.3. Melons 21
2.4. Brownian melons and the parabolic Airy line ensemble 22
2.5. Melon geodesics and the Airy sheet 25

Chapter 3. Tightness 29
3.1. Tightness of prelimiting sheets 29
3.2. Tightness of melon optimizers 32

Chapter 4. Last passage percolation across the parabolic Airy line ensemble 37
4.1. Parabolic paths, length, and geodesics in $\mathcal{B}$ 37
4.2. Disjoint optimizers in $\mathcal{B}$ 43

Chapter 5. Limits of Melon Optimizers and the Extended Airy Sheet 47
5.1. Convergence of $\mathcal{S}^n$ 47
5.2. Properties of the extended Airy sheet $\mathcal{S}$ 49
5.3. Metric composition law 53

Chapter 6. The Scaling Limit of Multi-point Brownian LPP 55
6.1. Tightness of the prelimiting extended landscape 55
6.2. The explicit construction of $\mathcal{L}^*$ 56

Chapter 7. Paths in the Extended Landscape 63
7.1. Path weights 63
7.2. Optimizers and transversal fluctuation 64
7.3. Monotonicity of optimizers 70
7.4. Sums of disjoint paths 71

Chapter 8. Disjointness of Optimizers 75
8.1. Convergence in the overlap topology 75
8.2. Two paths 77
8.3. Multiple paths 83

Chapter 9. Convergence of Optimizers 85

Appendix A. Appendix 89
A.1. Brownian melon estimates 89
A.2. Proof of Theorem 8.10 94
