

# Index

- L*-function
  - of  $E$ , 197
- $\lambda$ -invariant, 126
  - of  $K$ , 138
  - of  $M$ , 129
- $\mu$ -invariant, 126
  - of  $K$ , 138
  - of  $M$ , 129
- $p$ -adic *L*-function, 100
  - Kubota-Leopoldt, 102
- $p$ -adic Weierstrass Preparation Theorem, 126
  
- additive reduction, 193
- arithmetic-geometric mean, 63
- associated polynomial of  $f$ , 126
- automorphic form, 167, 171
- automorphic representation, 172
  
- bad reduction, 191
- Birch-Swinnerton-Dyer conjecture, 197
  
- character
  - cyclotomic, 110
  - of the first kind, 113
  - of the second kind, 113
  - Teichmüller, 111
  - trivial, 102
- characteristic ideal, 129
- class number relations, 183
- congruence subgroup, 75
  - principal, 74
- conjugacy class, 180
  
- cuspidal form
  - holomorphic, 68
- cyclotomic  $\mathbb{Z}_p$ -extension, 136
- cyclotomic character, 95, 110
- cyclotomic units
  - group of, 163
  
- decomposition group, 139
  
- Eisenstein series, 10
- equivalence classes of representations, 180
  
- Ferrero-Washington theorem of, 159
- Fourier transform, 174
- Frey curve, 202
  
- good reduction, 191
- Greenberg's conjecture, 153
- group of cyclotomic units, 163
  
- Hecke algebra, 71
- Hecke operator, 71
- Hecke's converse theorem, 27
- Herbrand and Ribet theorem of, 89
- holomorphic cuspidal form, 68
- holomorphic modular form, 68
  
- inertia group, 139
- irregular prime, 89
- Iwasawa function, 105
- Iwasawa main conjecture, 87, 97, 149

- Iwasawa theory, 87
- Iwasawa's formula, 143
- kernel function, 181
- Kronecker's limit formula, 47
- Kubota-Leopoldt's  $p$ -adic  $L$ -function, 102
- Kummer's congruence, 100
- Lambert series, 11
- Langlands conjectures, 185
- Lerch's formula, 50
- Mazur-Wiles
  - theorem of, 97, 149
- minimal Weierstrass model, 192
- modular elliptic curve, 199
- modular form
  - holomorphic, 68
  - modular group, 64
- Mordell operator, 5
- multiplicative reduction, 193
- nonsplit multiplicative reduction, 193
- Petersson inner product, 72, 74
- Phragmén-Lindelöf
  - theorem of, 30
- Poisson summation formula, 174
- principal congruence subgroup, 74
- pseudo-isomorphic, 128
- pseudo-measure, 111
- Ramanujan
  - conjecture, 3
- Ramanujan's congruence relation, 9
- Ramanujan's identities, 13
- Rankin-Selberg
  - method of, 42
- reduction
  - additive, 193
  - bad, 191
  - good, 191
  - multiplicative, 193
  - nonsplit multiplicative, 193
  - semi-stable, 193
  - split multiplicative, 193
- regular prime, 89
- regularized product, 49
- Ribet's theorem, 202
- right regular representation, 172
- Selberg  $\zeta$  function, 184
- Selberg trace formula, 180
- semi-stable elliptic curve, 193
- semi-stable reduction, 193
- Serre's conjecture, 203
- Siegel
  - modular form, 80
  - modular group, 80
  - upper half space, 80
- split multiplicative reduction, 193
- Stickelberger element, 157
- Stickelberger's theorem, 158
- Stirling's formula, 30
- Tate module, 195
- Tate twist, 156
- Teichmüller character, 111
- trivial character, 102
- upper half plane, 2
- Vandiver's conjecture, 153
- wave form, 73
- weight, 2
- Wilton
  - a result of, 25
