

## TABLE OF CONTENTS

DIDIER BRESCH — <i>Topics on compressible Navier-Stokes equations : non-degenerate viscosities</i> . . . . .	ix
1. Introduction . . . . .	ix
2. Some comments on the contributions . . . . .	x
ANTONIN NOVOTNÝ — <i>Lecture Notes on the Navier-Stokes-Fourier system : weak solutions, relative entropy inequality, weak strong uniqueness</i> . . . . .	1
1. Introduction . . . . .	1
2. Definitions and main results . . . . .	9
3. Weak compactness of the set of weak solutions . . . . .	13
4. Proof of Theorem 2.3. Relative entropy inequality . . . . .	28
5. Weak-strong uniqueness . . . . .	31
References . . . . .	40
RAPHAËL DANCHIN — <i>Fourier analysis methods for compressible flows</i> . . . . .	43
Introduction . . . . .	43
1. The Fourier analysis toolbox . . . . .	45
2. Solving the compressible Navier-Stokes equations in critical spaces . . . . .	62
3. Partially parabolic or dissipative linear PDEs . . . . .	80
4. Global results . . . . .	92
Appendix . . . . .	101
References . . . . .	103
MISHA PEREPELITSA — <i>Near-equilibrium weak solutions of the Navier-Stokes equations for compressible flows</i> . . . . .	107
1. Properties of the solutions at the interface of discontinuity . . . . .	107
2. Existence results . . . . .	112
3. Proof of Theorem 1 . . . . .	114
4. Dynamics of surfaces of discontinuity . . . . .	120
5. Dynamics of surfaces of discontinuity with corner singularities . . . . .	125
Appendix . . . . .	130
References . . . . .	134
