

## TABLE DES MATIÈRES

<i>Introduction : La géométrie algébrique réelle</i> .....	xi
FRÉDÉRIC MANGOLTE — <i>Real rational surfaces</i> .....	1
1. Introduction .....	1
2. Real rational surfaces .....	2
3. Automorphism groups of real loci .....	11
4. Approximation of differentiable maps by algebraic maps .....	16
5. Regulous maps .....	21
References .....	24
JEAN-PHILIPPE ROLIN — <i>A survey on o-minimal structures</i> .....	27
1. Basic definitions .....	28
2. The initial works in o-minimality .....	37
3. General Properties of o-minimal Structures .....	42
4. Examples of o-minimal structures .....	49
5. o-minimality and Diophantine Geometry .....	62
6. Establishing the O-minimality of Some Structures .....	67
7. Conclusion .....	72
References .....	73
KRZYSZTOF KURDYKA — <i>Analytic arcs and Real Analytic Singularities</i> .....	79
1. Introduction .....	79
2. Arc-symmetric subsets of affine space .....	81
3. Virtual Betti numbers .....	90
4. Blow-analytic equivalence and its invariants .....	94
5. Understanding arc-analytic equivalence .....	99
6. Analytic families of symmetric matrices .....	102
References .....	103
SAUGATA BASU — <i>Algorithms in Real Algebraic Geometry : A Survey</i> .....	107
1. Introduction .....	108
2. Quantifier elimination and related problems .....	111

3. Computing topological invariants of semi-algebraic sets .....	127
4. Sums of squares and semi-definite programming.....	144
5. Open problems .....	147
References .....	148
VICTORIA POWERS — <i>Positive Polynomials and Sums of Squares : Theory and Practice</i> .....	
1. Preliminaries and background .....	155
2. Theory : Certificates of Positivity .....	159
3. Practice : Computational and algorithmic issues .....	167
References .....	175
