Résumés des articles	ix
Abstracts	xi
STÉPHANE BOUCHERON & NICOLAS VAYATIS — <i>Presentation</i>	xiii
1. A brief history of Statistical Learning Theory	xiii
2. Binary classification	xx
3. Minimally supervised learning	xxix
4. Online learning	xxxv
5. Least-square regression from a statistical learning viewpoint	xxxviii
References	xliii
SANJOY DASGUPTA — <i>Algorithms for minimally supervised learning</i>	1
1. Introduction	1
2. Clustering	3
3. Exploiting low intrinsic dimensionality	22
4. Active learning	37
References	54
PETER L. BARTLETT — <i>Online Prediction</i>	59
1. Prediction as a Repeated Game	59
2. A Finite Comparison Class	61
3. Online and adversarial versus batch and probabilistic	69
4. Optimal Regret	76
5. Bibliographic notes	86
References	87
