Preface	ix
Character values and Hochschild homology ROMAN BEZRUKAVNIKOV and DAVID KAZHDAN	1
Schwartz space of parabolic basic affine space and asymptotic Hecke algebras ALEXANDER BRAVERMAN and DAVID KAZHDAN	31
Explicit local Jacquet-Langlands correspondence: The non-dyadic wild case COLIN J. BUSHNELL and GUY HENNIART	45
On the Casselman-Jacquet functor T.-H. CHEN, D. GAITSGORY, and A. YOM DIN	73
Periods and theta correspondence WEE TECK GAN	113
Generalized and degenerate Whittaker quotients and Fourier coefficients DMITRY GOUREVITCH and SIDDHARTHA SAHI	133
Geometric approach to the fermionic Fock space, via flag varieties and representations of algebraic (super)groups CAROLINE GRUSON and VERA SERGANOVA	155
Representations of a $p$ -adic group in characteristic $p$ G. HENNIART and M.-F. VIGNÉRAS	171
On the support of matrix coefficients of supercuspidal representations of the general linear group over a local non-archimedean field EREZ LAPID	211
On the generalized Springer correspondence G. LUSZTIG	219
The modular pro- $p$ Iwahori-Hecke Ext-algebra RACHEL OLLIVIER and PETER SCHNEIDER	255
Affine Hecke algebras and the conjectures of Hiraga, Ichino and Ikeda on the Plancherel density ERIC OPDAM	309
Limiting cycles and periods of Maass forms ANDRE REZNIKOV	351

On vector-valued twisted conjugation invariant functions on a group; with an appendix by Stephen Donkin LIANG XIAO and XINWEN ZHU	361
Local theta correspondence and nilpotent invariants CHEN-BO ZHU	427
