Preface	vii
Quiver DT invariants and log Gromov–Witten theory of toric varieties HÜLYA ARGÜZ	1
Root bundles: Applications to F-theory Standard Models MARTIN BIES	17
Holomorphic Floer theory and Donaldson–Thomas invariants PIERRICK BOUSSEAU	45
Giant Gravitons and non-conformal vacua in twisted holography KASIA BUDZIK	79
Introduction to topological symmetry in QFT DANIEL S. FREED	93
Superconformal algebras for the Schoen Calabi–Yau manifold MATEO GALDEANO	107
Langlands duality for skein modules of 3-manifolds DAVID JORDAN	127
Link homology from homological mirror symmetry ELISE LEPAGE	151
Analytic continuation and supersymmetry NIKITA NEKRASOV	167
6D heterotic little string theories and F-theory geometry: An introduction MICHELE DEL ZOTTO, MUYANG LIU, and PAUL-KONSTANTIN OEHLMANN	179
Vafa–Witten theory: Invariants, Floer homologies, Higgs bundles, a geometric Langlands correspondence, and categorification MENG-CHWAN TAN	201
A holomorphic approach to fivebranes BRIAN WILLIAMS	219
Algebras, regions, and observers EDWARD WITTEN	247
Invertible QFTs and differential Anderson duals MAYUKO YAMASHITA	277
