

Contents

Preface	ix
Summer School Program	xi
Research Conference Program	xiii
List of Additional Participants	xv
Reminiscences on the Occasion of Tom Mrowka's 60th Birthday	xxi
Lectures on families of Dirac operators and applications FRANCESCO LIN	1
Lectures on generalised Seiberg–Witten equations THOMAS WALPUSKI	17
A splitting formula in instanton Floer homology NIMA ANVARI	41
Finite group actions on 4-manifolds and equivariant bundles NIMA ANVARI and IAN HAMBLETON	49
Exotic families of embeddings DAVE AUCKLY and DANIEL RUBERMAN	71
An instanton take on some knot detection results JOHN A. BALDWIN and STEVEN SIVEK	99
Examples of homology 3-spheres whose Chern-Simons function is not Morse-Bott HANS U. BODEN, CHRISTOPHER M. HERALD, and PAUL KIRK	117
Blowup formulas for Segre and Verlinde numbers of surfaces and higher rank Donaldson invariants LOTHAR GÖTTSCHE	127
A note on PL-disks and rationally slice knots KRISTEN HENDRICKS, JENNIFER HOM, MATTHEW STOFFREGEN, and IAN ZEMKE	153
Khovanov homology of strongly invertible knots and their quotients ROBERT LIPSHITZ and SUCHARIT SARKAR	157
On almost complex embeddings of rational homology balls PAOLO LISCA and ANDREA PARMA	183

Explicitly describing fibered 3-manifolds through families of singularly fibered surfaces	
MAGGIE MILLER	195
On the minimal genus problem in four-manifolds	
ANDRÁS I. STIPSICZ and ZOLTÁN SZABÓ	215
The Gysin sequence and the $\mathfrak{sl}(N)$ homology of $T(2, m)$	
JOSHUA WANG	233
Heegaard Floer multicurves of double tangles	
CLAUDIUS ZIBROWIUS	253
