

# CONTENTS

<b>Introduction</b> .....	7
<b>1. Algebras, brackets, and bibrackets</b> .....	13
1.1. Algebras and brackets .....	13
1.2. Bibrackets .....	16
1.3. Equivariance .....	21
1.4. The associated pairing and the trace .....	23
<b>2. Bibrackets in unital algebras and in categories</b> .....	27
2.1. Bibrackets in unital algebras .....	27
2.2. Bibrackets in categories .....	29
2.3. Bibrackets in Hopf categories .....	31
2.4. Hamiltonian reduction of bibrackets .....	39
<b>3. Face homology</b> .....	43
3.1. Manifolds with faces and partitions .....	43
3.2. Polychains, polycycles, and face homology .....	46
3.3. Face homology versus singular homology .....	53
3.4. Smooth polychains .....	63
<b>4. Operations on polychains</b> .....	69
4.1. Transversality in path spaces .....	69
4.2. Intersection of polychains .....	74
4.3. The operation $\tilde{\Upsilon}$ .....	78
4.4. The operation $\Upsilon$ .....	87
<b>5. The intersection bibracket</b> .....	93
5.1. Construction of the intersection bibracket .....	93
5.2. The Jacobi identity .....	97
5.3. Computations and examples .....	110

<b>6. Properties of the intersection bibracket</b> .....	117
6.1. The scalar intersection form .....	117
6.2. The reducibility .....	122
6.3. The string bracket .....	124
6.4. Moment maps and Hamiltonian reduction .....	127
<b>Bibliography</b> .....	133
<b>Index</b> .....	137
