

CONTENTS

1. Introduction	1
2. Notations and conventions	11
3. Blow-ups and dilatations	13
4. Hopf algebras and groupoids	19
5. Connections and stratifications	29
6. Local constructions of Shiho	37
7. Oyama topoi	43
8. Crystals in Oyama topoi	49
9. Cartier equivalence	55
10. Cartier transform of Ogus-Vologodsky	69
11. Prelude on rings of differential operators	79
12. Comparison with the Cartier transform of Ogus-Vologodsky	89
13. Fontaine modules	105
14. The Fontaine module structure on the crystalline cohomology of a Fontaine module	121
Bibliography	131
