

CONTENTS

Introduction	1
0.1. Selmer complexes	1
0.2. Selmer complexes and (φ, Γ) -modules	4
0.3. p -adic height pairings	6
0.4. General remarks	10
0.5. p -adic L -functions	12
0.6. The organization of this paper	17
Acknowledgements	18
1. Complexes and products	19
1.1. The complex $T^\bullet(A^\bullet)$	19
1.2. Products	27
2. Cohomology of (φ, Γ_K)-modules	33
2.1. (φ, Γ_K) -modules	33
2.2. Relation to p -adic Hodge theory	36
2.3. Local Galois cohomology	39
2.4. The complex $C_{\varphi, \gamma_K}(\mathbf{D})$	40
2.5. The complex $K^\bullet(V)$	42
2.6. Transpositions	46
2.7. The Bockstein map	48
2.8. Iwasawa cohomology	52
2.9. The group $H_f^1(\mathbf{D})$	54
3. p-adic height pairings I: Selmer complexes	59
3.1. Selmer complexes	59
3.2. p -adic height pairings	71
4. Splitting submodules	79
4.1. Splitting submodules	79
4.2. The canonical splitting	81
4.3. Filtration associated to a splitting submodule	83
4.4. Appendix. Some semilinear algebra	97
5. p-adic height pairings II: universal norms	101

5.1. The pairing $h_{V,D}^{\text{norm}}$	101
5.2. Comparison with $h_{V,D}^{\text{sel}}$	106
6. p-adic height pairings III: splitting of local extensions	111
6.1. The pairing $h_{V,D}^{\text{spl}}$	111
6.2. Comparison with Nekovář's height pairing	113
6.3. Comparison with $h_{V,D}^{\text{norm}}$	116
7. p-adic height pairings IV: extended Selmer groups	119
7.1. Extended Selmer groups	119
7.2. Comparison with $h_{V,D}^{\text{spl}}$	121
7.3. The pairing $h_{V,D}^{\text{norm}}$ for extended Selmer groups	125
Bibliography	129
