

# CONTENTS

<b>1. Introduction</b> .....	1
<b>2. Notations, preliminaries and results on the top cohomology</b> .....	5
2.1. The pro- $p$ -Iwahori Hecke algebra .....	5
2.2. The Ext-algebra .....	6
2.3. The top cohomology $E^d$ when $\mathbf{G}$ is almost simple simply connected ....	11
2.4. The pro- $p$ -Iwahori Hecke algebra of $\mathrm{SL}_2$ .....	14
2.5. On some values of the functor $H^d(I, -)$ when $\mathbf{G} = \mathrm{SL}_2$ .....	21
<b>3. Formulas for the left action of <math>H</math> on <math>E^1</math> when <math>\mathbf{G} = \mathrm{SL}_2(\mathbb{Q}_p)</math>, <math>p \neq 2, 3</math></b> .....	25
3.1. Conjugation by $\varpi$ .....	25
3.2. Elements of $E^1$ as triples .....	26
3.3. Image of a triple under the anti-involution $\mathcal{J}$ .....	30
3.4. Action of $\tau_\omega$ on $E^1$ for $\omega \in \Omega$ .....	31
3.5. Action of the idempotents $e_\lambda$ .....	32
3.6. Action of $H$ on $E^1$ when $G = \mathrm{SL}_2(\mathbb{Q}_p)$ , $p \neq 2, 3$ .....	33
3.7. Sub- $H$ -bimodules of $E^1$ .....	36
<b>4. Formulas for the left action of <math>H</math> on <math>E^{d-1}</math> when <math>G = \mathrm{SL}_2(\mathbb{Q}_p)</math>, <math>p \neq 2, 3</math></b> .....	49
4.1. Elements of $E^{d-1}$ as triples .....	49
4.2. Left action of $\tau_\omega$ on $E^{d-1}$ for $\omega \in \Omega$ .....	51
4.3. Left action of $H$ on $E^2$ when $G = \mathrm{SL}_2(\mathbb{Q}_p)$ , $p \neq 2, 3$ .....	52
<b>5. <math>k[\zeta]</math>-torsion in <math>E^*</math> when <math>G = \mathrm{SL}_2(\mathbb{Q}_p)</math>, <math>p \neq 2, 3</math></b> .....	55
<b>6. Structure of <math>E^1</math> and <math>E^2</math> when <math>G = \mathrm{SL}_2(\mathbb{Q}_p)</math>, <math>p \neq 2, 3</math></b> .....	59
6.1. Preliminaries .....	59
6.2. Structure of $E^1$ .....	60
6.3. Structure of $E^2$ .....	65
<b>7. On the left <math>H</math>-module <math>H^*(I, V)</math> when <math>G = \mathrm{SL}_2(\mathbb{Q}_p)</math> with <math>p \neq 2, 3</math> and <math>V</math> is of finite length</b> .....	75
<b>8. The commutator in <math>E^*</math> of the center of <math>H</math> when <math>G = \mathrm{SL}_2(\mathbb{Q}_p)</math>, <math>p \neq 2, 3</math></b> .....	81
8.1. The product $(\mathcal{C}_{E^1}(Z), \mathcal{C}_{E^1}(Z)) \rightarrow \mathcal{C}_{E^2}(Z)$ .....	82
8.2. The products $(\mathcal{C}_{E^i}(Z), \mathcal{C}_{E^{3-i}}(Z)) \rightarrow \mathcal{C}_{E^3}(Z)$ for $i = 1, 2$ .....	85

<b>9. Appendix</b> .....	89
9.1. Proof of Proposition 2.1 .....	89
9.2. Computation of some transfer maps .....	91
9.3. Proof of Proposition 3.9 .....	93
9.4. Proof of Proposition 4.5 .....	95
References .....	96
<b>Bibliography</b> .....	97
