Introduction . . . . .	xi
Note to the Reader . . . . .	xvii
Acknowledgements . . . . .	xix
Theory of Parallels — Lobachevski’s Introduction . . . . .	1
Theory of Parallels — Preliminary Theorems (1–15) . . . . .	3
Theory of Parallels 16: The Definition of Parallelism . . . . .	11
Theory of Parallels 17: Parallelism is Well-Defined . . . . .	23
Theory of Parallels 18: Parallelism is Symmetric . . . . .	26
Theory of Parallels 19: The Saccheri-Legendre Theorem . . . . .	28
Theory of Parallels 20: The Three Musketeers Theorem . . . . .	35
Theory of Parallels 21: A Little Lemma . . . . .	44
Theory of Parallels 22: Common Perpendiculars . . . . .	46
Theory of Parallels 23: The $\Pi$ -function . . . . .	50
Theory of Parallels 24: Convergence of Parallels . . . . .	57
Theory of Parallels 25: Parallelism is Transitive . . . . .	60
Theory of Parallels 26: Spherical Triangles . . . . .	67
Theory of Parallels 27: Solid Angles . . . . .	73
Theory of Parallels 28: The Prism Theorem . . . . .	79
Theory of Parallels 29: Circumcircles or Lack Thereof (Part I) . . . . .	84
Theory of Parallels 30: Circumcircles or Lack Thereof (Part II) . . . . .	87
Theory of Parallels 31: The Horocycle Defined . . . . .	92
Theory of Parallels 32: The Horocycle as a Limit-Circle . . . . .	103
Theory of Parallels 33: Concentric Horocycles . . . . .	108
Theory of Parallels 34: The Horosphere . . . . .	122
Theory of Parallels 35: Spherical Trigonometry . . . . .	139
Theory of Parallels 36: The Fundamental Formula . . . . .	166
Theory of Parallels 37: Plane Trigonometry . . . . .	177
Bibliography . . . . .	197
Appendix: Nicolai Ivanovich Lobachevski’s <i>Theory of Parallels</i> . . . . .	199
Index . . . . .	223
About the Author . . . . .	227
