

# Contents

<b>Preface</b>	<b>ix</b>
<b>Acknowledgements</b>	<b>xi</b>
<b>1 Introduction</b>	<b>1</b>
1.1 What is a collapse? . . . . .	1
1.2 Shades of Hitchcock, and other tales . . . . .	2
1.3 What might tomorrow bring? . . . . .	6
1.4 What this book aims to do . . . . .	13
<b>2 Predicting Unpredictable Events</b>	<b>15</b>
2.1 Like a thief in the night? . . . . .	15
2.2 Chance and regularity . . . . .	17
2.3 A quick statistics primer . . . . .	18
2.4 Normal regularity: the good, the bad, and the miraculous . . . . .	22
2.5 Abnormal regularity: extreme value statistics . . . . .	25
2.6 Getting things right with heavy-tailed distributions . . . . .	31
2.7 The dangers from getting your probabilities wrong . . . . .	35
<b>3 Group Behavior: Crowds, Herds, and Video Games</b>	<b>41</b>
3.1 Fire! . . . . .	41
3.2 Birds, boids, and bicycles . . . . .	44
3.3 The Monte Carlo world . . . . .	48
3.4 Models with probabilities . . . . .	50
3.5 People, properties, and political systems . . . . .	54
3.6 Connections to other chapters . . . . .	59
<b>4 Evolution and Collapse: Game Playing in a Changing World</b>	<b>61</b>
4.1 My New Hampshire . . . . .	61
4.2 Strategies and games . . . . .	63
4.3 Iterated and evolutionary game playing . . . . .	68
4.4 Modeling the evolution of species and cultures . . . . .	74
4.5 Implications for understanding collapse . . . . .	80

**5 Instability, Oscillation, and Feedback 85**

- 5.1 Sharing an electric blanket and other challenges . . . . . 85
- 5.2 Primer on differential equations . . . . . 91
- 5.3 Stable and unstable equilibrium points and related concepts . . . . . 97
- 5.4 The dynamics of interacting populations . . . . . 100
- 5.5 Structural collapses and related processes . . . . . 106
- 5.6 The science of trying to maintain control . . . . . 112
- 5.7 The Chernobyl disaster . . . . . 115

**6 Nonlinearity: Invitation to Chaos and Catastrophe 121**

- 6.1 The elephant’s toenail . . . . . 121
- 6.2 Local linearity . . . . . 122
- 6.3 Bifurcations, tipping points, and catastrophes . . . . . 127
- 6.4 Hysteresis: where there may be no simple turning back . . . . . 134
- 6.5 Chaos: beginning with a butterfly . . . . . 138

**7 It’s All About Networks 145**

- 7.1 How’s your networking? . . . . . 145
- 7.2 Network fundamentals . . . . . 147
- 7.3 Important variations in network macrostructure . . . . . 152
- 7.4 Unexpected network crashes . . . . . 157
- 7.5 Interactive dynamics across networks . . . . . 161
- 7.6 Spreading processes through networks . . . . . 165
- 7.7 A surprising game on a network . . . . . 167
- 7.8 Networks in an evolutionary context . . . . . 169

**8 Putting It All Together: Looking at Collapse Phenomena in “6-D” 173**

- 8.1 A quick review . . . . . 173
- 8.2 The utility of multiple perspectives in understanding the risk of collapse . . . . . 175
- 8.3 Where to go from here: the modern field of complexity theory . . . . . 186
