

# Index

## A

abelian function, 349  
accidental crossing, 51  
action-reaction principle, 363  
Ahlfors, Lars, 292  
Aiguille du roc, 3  
Aleksandrov, Pavel, 128, 130, 131, 135  
Alexander, James, 136  
alkanes, 352  
analytic, 38, 151, 152, 154–157, 217–219,  
226, 374, 375  
analytic variety, 226, 227, 370  
Appel and Haken, 44, 80  
Applied Mathematics Panel, 193  
Arithmetic Logic Unit, 351  
atomic chain reaction, 190

## B

Bamberger, Caroline, 199  
Bamberger, Louis, 199  
base space, 183  
basis, 86  
basis of a graph, 90  
Benezet, Louis P., 238–242, 245  
Bennington College, 290  
Bennington music camp, 279, 295, 297  
Bertrand, Louis, 101  
Betti number, 112–114, 126–128, 131, 140,  
184  
Betti, Enrico, 107, 113  
bifurcation, 211, 366–370  
bifurcation diagram, 367  
Birkhoff, Garrett, 193  
Birkhoff, George David, 4, 43–45, 52, 69, 70,  
75, 79, 374  
Bohr, Neils, 190  
bounded, 110, 113, 126, 178, 221, 269

broken cycle, 76  
Brouwer, L. E. J., 128  
buckling rod, 212–214  
butterfly effect, 210  
butterfly round, 306

## C

Calvin Academy, 101  
cardioid, 200  
Cartan, Henri, 293  
catastrophe, 210–213, 367  
catastrophe theory, 200, 211, 214, 366  
Cayley, Arthur, 48, 49  
Čech, Eduard, 127, 136  
Celebratio Mathematica, xi  
cello, 251, 252, 276  
cellular decomposition, 221  
centipede graph, 72  
chain, 49, 64, 67, 72, 117, 118, 122, 125–129,  
131, 137, 190  
chaos, 200  
characteristic class, 183, 184  
chromatic polynomial, 52, 69–76, 78–80  
circles of latitude, 115  
Clerc, Gaston, 30  
Clerc, Gaston, 31  
clock arithmetic, 358  
coboundary operator, 137  
cochain, 137, 139  
cocycle, 139  
codimension, 179  
cohomology, 97, 136–141, 184, 366  
cohomology group, 138, 139  
colored graph, 43  
coloring, 26, 43, 47, 49, 52, 56, 58, 59, 69–72,  
74, 75, 78–81, 253, 263, 278, 373, 374  
combinatorial dual, 64

combinatorial topology, 134, 357  
 complete bipartite graph, 351  
 complete graph, 71, 351  
 complete tripartite graph, 351  
 complex number, polar decomposition, 218  
 complex number, rectangular  
   decomposition, 218  
 complex variables, 38  
 conditions (a) and (b), 226  
 connected, 47, 56, 63, 64, 68–71, 76, 78, 80,  
   85, 99, 180, 231, 375  
 connected graph, 84, 86  
 connectivity, 107, 108  
 convex, 119  
 convex hull, 119  
 Corona typewriter, 46  
 cup product, 136, 138–141, 184  
 cusp, 200, 207, 211, 221, 222  
 cusp singularity, 211  
 cut (bonds), 64

## D

Danzig, Prussia, 98  
 De Morgan, Augustus, 47, 48, 351  
 decision graph, 353  
 dependent set, 85  
 derivative, one-sided, 145  
 differentiable manifold, 161  
 differential equations, 282  
 Dirac, Gabriel, 50  
 Dirac, P. A. M., 39, 270  
 direct sum, 139, 358  
 double point, 201  
 dual graph, 49  
 dual matroid, 90, 91  
 duality, 6, 56, 57, 69, 90, 126, 127, 184, 217,  
   351

## E

edge-cut, 68  
 Ehler, Carl, 98  
 Einstein, Albert, 190  
 elliptic function, 350  
 embedding, 166, 168, 170–172, 175, 182, 200,  
   217, 271, 366  
 Euler characteristic, 126  
 Euler's formula, 118  
 Euler's formula, 101, 105, 118  
 Euler's polyhedral formula, 100, 101, 105  
 Euler, Leonhard, 118  
 Euler, Leonhard, 97–101, 105, 118, 356

Euler-Poincaré characteristic, 126  
 even function, 363  
 exchange property, 88  
 excluded region, 33, 38  
 extension, 144, 146, 147, 149, 152, 157, 166,  
   169, 200, 217, 374

## F

Fantasie for Orchestra, 39  
 Fermi, Enrico, 190  
 finitely generated abelian group, 135  
 Flatland, 109, 110  
 Flexner, Abraham, 199  
 flivver, 5  
 fold point, 206  
 Folium of Descartes, 177  
 Ford Model T, 5  
 four-color problem, 183  
 four-color problem, 4, 41, 43, 47–49, 52, 53,  
   55, 61, 62, 69, 79, 80, 134, 143, 219, 221,  
   351, 375  
 Frisch, Otto, 190  
 fundamental theorem of algebra, 260

## G

gamma function, 356  
 Gauss, Carl Friedrich, 100, 102, 103  
 generic intersection, 179  
 genus, 72, 107, 109, 110, 140, 263–265  
 genus of a graph, 72, 352  
 geometriam situs, 100  
 geometric dual, 64  
 geometry of position, 98, 100  
 Gieseking, Walter, 271, 370  
 Gödel, Kurt, 198  
 Goldbach conjecture, 356  
 Goldbach, Christian, 355  
 Göttingen, 39, 102, 107, 128, 129  
 graded, 139  
 graph, 55  
 graph drawing, 55  
 graph theory, 4, 52, 62, 63, 84, 85, 99, 134  
 graph, planar, 49, 56, 58, 59, 61, 68, 72, 91,  
   183, 373, 374  
 greedy algorithm, 353  
 group, 282, 295, 357  
 group homomorphism, 128  
 Guthrie, Francis, 47

**H**

Hahn, Otto, 190  
 Hamilton, Sir William Rowan, 47, 52  
 Hamiltonian cycle, 52, 59, 60, 99  
 Harvard, 4, 18, 39, 43, 45, 46, 193, 374  
 Hassler, Ferdinand, 14  
 Heawood, Percy, 49, 50  
 Heesch, Heinrich, 79  
 Hercules, 25  
 Hercules Cluster, 25  
 homeomorphic with, 351  
 homogeneous polynomial, 223  
 homogeneous set, 223  
 homologous to zero, 126, 131  
 homology group, 131, 135  
 homology theory, 113  
 Hopf, Heinz, 128, 130, 135, 375  
 hyperelliptic function, 350

**I**

ice, 27  
 icosian game, 52  
 ideal pendulum, 350  
 independent set, 85  
 Institute pond, 304  
 iron, 28

**K**

Kempe chain, 49  
 Kempe, Alfred, 49, 69, 79  
 Kirby, Robion, xi  
 Klein bottle, 131, 172, 186  
 Klein, Felix C., 127  
 Kolmogoroff, Andrey, 136  
 Complete graph, 64  
 Königsberg seven bridges problem, 97  
 Kurakowski's criterion, 52, 63, 64, 69  
 Kuratowski, Kazimierz, 63  
 Kuratowski, Kazimierz, 52

**L**

labyrinth maze game, xi, 291  
 ladder rung graph, 70  
 Law of the Cube, 27, 345  
 Lax, Anneli, 247  
 Lefschetz, Solomon, 100, 128, 130  
 Legendre, Adrien-Marie, 100  
 Leibniz, 100  
 Leibniz rule, 139, 153, 154, 354  
 lemniscate, 201, 202, 223

Lewis diagram, 72  
 Lex Sario, 371  
 L'Huilier, Simon-Antoine-Jean, 101, 102  
 lim, 101  
 limaçõn, 200  
 linear alkanes, 72  
 Lissajous figure, 220, 221  
 Listing, Johann, 100–105  
 logarithmically concave, 74  
 London Mathematical Society, 48  
 loop, 59, 65, 70, 86, 87, 91, 92, 108–110,  
 112–116, 118, 121, 126, 127, 162, 172,  
 176, 178–183, 213, 214, 230

**M**

Mac Lane, Saunders, 4, 193  
 manifold, 83, 110–113, 118, 119, 121, 126,  
 127, 129–131, 135–137, 161, 162, 165,  
 172, 175, 178–180, 182–184, 199, 206,  
 208, 219–221, 224, 225, 227, 262, 263,  
 365–367, 375  
 mathematical induction, 351  
 Mather, John, 226  
 matroid, 83, 84, 89–92, 353  
 maximal basis, 88  
 Maxwell, James Clerk, xi  
 Meitner, Lise, 190  
 Mendeleyev, Dmitri, 134  
 meridian circles, 115  
 Möbius strip, 104, 183  
 Möbius, August Ferdinand, 104, 127  
 Mont Blanc, 3  
 Montgomery, Deane, 292  
 Mount Whitney, 10  
 Mt. Dent Blanche, 311  
 multi-torus, 126  
 music, 6

**N**

nappe, 223  
 National Medal of Science, 306  
 Needle Rock, 3  
 Newcomb, Simon, 10  
 NOAA Ferdinand R. Hassler, 17  
 node, 55  
 Noether, Emmy, 128, 130, 136, 184  
 nonlinear dynamics, 200  
 nonplanar graph, 51  
 nonsingular, 218, 264  
 normal bundle, 365  
 normal form, 60, 206–208

**O**

odd function, 363  
 one-sided derivative, 145, 359  
 Oppenheimer, J. Robert, 197  
 optimization problem, 353  
 Orbita, 29  
 orient, 122  
 orientable, 110, 113, 126, 178, 262  
 orientation, 114, 115, 117, 122, 124, 139, 178  
 oriented, 114–116, 122, 123, 125  
 Osterman, Barbara, 307

**P**

parallel, 90  
 Pascal triangle, 365  
 path graph, 70  
 Peirce, Charles, 351  
 perceived singularity, 201, 202  
 period-doubling, 367, 369, 370  
 piano, 2, 29, 30, 39, 45, 271  
 Pierpont, James, 3, 4, 37–39, 270  
 planar, 49, 51, 52, 56, 58, 59, 61–64, 68, 69,  
 72, 90, 91, 183, 373, 374  
 pleat point, 207  
 Poincaré duality, 126  
 Poincaré, Henri, 100, 112, 113, 116, 118, 126,  
 128, 129, 131, 161, 184, 210, 211  
 Popular Science, 1, 3, 24, 252

**Q**

quotient group, 131

**R**

real part, 220  
 real projective plane, 257  
 Rees, Mina, 193  
 regular stratification, 226  
 Riemann, Bernhard, 107  
 Riemann, Bernhard, 38, 40, 100, 107–109  
 rose, 200, 201, 220, 224, 229  
 rust, 28

**S**

Sario, Leo, 277, 371  
 Saturn, 26  
 scheduling, 80  
 searchlight, 25, 28, 29  
 series, 90  
 Shimamoto, Yoshio, 79

simplex, 119, 121–126, 129, 131, 137, 138,  
 183  
 simplicial complex, 89, 121, 122, 126, 128,  
 129, 137, 183, 225  
 singularity, 201–203, 205, 219, 220, 222–224,  
 230  
 slide rule, 31–33  
 smooth, 109, 118, 119, 122, 147, 149, 150,  
 157, 162, 166, 168–170, 172, 175, 176,  
 180, 182, 183, 200–202, 206–208, 210,  
 219, 222–224, 229, 275, 366, 367  
 smooth “ramp function”, 151  
 span, 85, 86  
 sphere bundle, 365  
 Square-Cube law, 345  
 stable, 201  
 Städel Foundation, 102  
 Städel, Johann Friedrich, 102  
 star graph, 70  
 Steenrod, Norman, 366  
 Steinway piano, 18  
 Stiefel-Whitney characteristic class, 183  
 Stokes’s Theorem, 366  
 strata, 219  
 stratification, 219, 222, 224, 226–229, 231  
 Sudoku, 81  
 Szilard, Leo, 190

**T**

tangent bundle, 365  
 Taylor series, 148, 155, 158, 218, 359  
 Taylor, Brook, 359  
 Thom, René, 200, 211, 212, 214, 225–227,  
 367  
 Tietze extension theorem, 144  
 Tin Lizzie, 5  
 topological, 55  
 topological arc, 350  
 topological product, 225  
 torus, 101, 111–119, 121, 122, 127, 140, 180,  
 208, 209, 261, 262  
 transversal, 56, 68, 91, 183, 201, 229  
 tree, 74  
 trefoil knot, 104  
 triangulate, 126, 129, 137  
 triangulated manifold, 118  
 triangulated space, 222  
 triangulation, 59, 118, 119, 121, 127, 128, 131  
 Trisectrix of Maclaurin, 177  
 Turing, Alan, 79  
 Tutte, William, 79

two-sided limit, 101

## U

unstable, 203

USCSS Hassler, 16

## V

Veblen, Oswald, 161

viola, 39, 252, 271, 296

violin, 6, 39, 211, 251, 252

von Neumann, John, 351

## W

Weierstrass, Karl, 38, 40, 347

Whitehead, J. H. C., 161

Whitney duality theorem, 184

Whitney immersion theorem, 184

Whitney Museum, 10

Whitney trick, 176, 178–182

Whitney umbrella, 208, 210

Whitney's planarity criterion, 52

Whitney, Caroline, 18

Whitney, Edward Baldwin, 12

Whitney, Gertrude Vanderbilt, 10

Whitney, John, 10

Whitney, Josepha Newcomb, 11

Whitney, Josiah, 12

Whitney, Lisa, 21

Whitney, Roger, 18

Whitney, Simon, 21

Whitney, William, 20

Whitney, William Dwight, 11

Whyburn, William, 143

Wolf Prize, 306

## Z

zero loop, 114
