IAS/Park City Mathematics Institute	xi
Preface	xiii
Chapter 1. Motivation and preliminaries	1
§1.1. The heat equation in equilibrium	1
§1.2. Holomorphic functions	3
§1.3. Know thy calculus	4
§1.4. The Dirichlet principle	9
Exercises	11
Chapter 2. Basic properties	13
§2.1. The mean value property	13
§2.2. The maximum principle	20
§2.3. Poisson kernel and Poisson integrals in the ball	24
§2.4. Isolated singularities	29
Exercises	31
Notes	34
Chapter 3. Fourier series	35
§3.1. Separation of variables	35
§3.2. Fourier series	38

§3.3. Abel means and Poisson integrals	43
§3.4. Absolute convergence	48
§3.5. Fejér's theorem	54
§3.6. Mean-square convergence	59
§3.7. Convergence for continuous functions	62
Exercises	68
Notes	70
Chapter 4. Poisson kernel in the half-space	71
§4.1. The Poisson kernel in the half-space	71
§4.2. Poisson integrals in the half-space	74
§4.3. Boundary limits	77
Exercises	80
Notes	82
Chapter 5. Measure theory in Euclidean space	83
§5.1. The need for an integration theory	83
§5.2. Outer measure in Euclidean space	85
§5.3. Measurable sets and measure	89
§5.4. Measurable functions	96
Exercises	102
Notes	103
Chapter 6. Lebesgue integral and Lebesgue spaces	105
§6.1. Integration of measurable functions	105
§6.2. Fubini's theorem	120
§6.3. The Lebesgue space L^1	124
§6.4. The Lebesgue space L^2	130
Exercises	134
Notes	135
Chapter 7. Maximal functions	137
§7.1. Indefinite integrals and averages	137
§7.2. The Hardy–Littlewood maximal function	138

§7.3. The Lebesgue differentiation theorem	143
§7.4. Boundary limits of harmonic functions	145
Exercises	148
Notes	150
Chapter 8. Fourier transform	151
§8.1. Integrable functions	151
§8.2. The Fourier inversion formula	156
§8.3. Mean-square convergence	159
Exercises	164
Notes	165
Chapter 9. Hilbert transform	167
§9.1. The conjugate function	167
§9.2. Mean-square convergence	168
§9.3. The Hilbert transform of integrable functions	172
§9.4. Convergence in measure	179
Exercises	181
Notes	183
Chapter 10. Mathematics of fractals	185
§10.1. Hausdorff dimension	185
§10.2. Self-similar sets	191
Exercises	201
Notes	202
Chapter 11. The Laplacian on the Sierpiński gasket	203
§11.1. Discrete energy on the interval	203
§11.2. Harmonic structure on the Sierpiński gasket	207
§11.3. The Laplacian on the Sierpiński gasket	212
Exercises	219
Notes	220
Chapter 12. Eigenfunctions of the Laplacian	223
§12.1. Discrete eigenfunctions on the interval	224

§12.2. Discrete eigenfunctions on the Sierpiński gasket	227
§12.3. Dirichlet eigenfunctions	233
Exercises	241
Notes	242
Chapter 13. Harmonic functions on post-critically finite sets	243
§13.1. Post-critically finite sets	243
§13.2. Harmonic structures and discrete energy	245
§13.3. Discrete Laplacians	250
§13.4. The Laplacian on a PCF set	255
Exercises	257
Notes	258
Appendix A. Some results from real analysis	259
§A.1. The real line	259
§A.2. Topology	261
§A.3. Riemann integration	262
§A.4. The Euclidean space	265
§A.5. Complete metric spaces	267
Acknowledgments	271
Bibliography	273
Index	277
