Contents

IAS/Park City Mathematics Institute vii

Preface ix

Acknowledgements xii

Chapter 1. Warming up to Enumerative Geometry 1

Exercises 10

Chapter 2. Enumerative Geometry in the Projective Plane 13

Exercises 25

Chapter 3. Stable Maps and Enumerative Geometry 27

Exercises 41

Chapter 4. Crash Course in Topology and Manifolds 43

Exercises 55

Chapter 5. Crash Course in C^∞ Manifolds and Cohomology 57

Exercises 76

Chapter 6. Cellular Decompositions and Line Bundles 77

Exercises 92

Chapter 7. Enumerative Geometry of Lines 95

Exercises 108

Chapter 8. Excess Intersection 111
Exercises 123

Chapter 9. Rational Curves on the Quintic Threefold 125
Exercises 133

Chapter 10. Mechanics 135
Exercises 143

Chapter 11. Introduction to Supersymmetry 145
Exercises 156

Chapter 12. Introduction to String Theory 157
Exercises 171

Chapter 13. Topological Quantum Field Theory 173
Exercises 184

Chapter 14. Quantum Cohomology and Enumerative Geometry 185
Exercises 196

Bibliography 197

Index 201
