Contents

Preface ix

Chapter 1. Introduction 1

§1.1. Notation and Arithmetical Functions 1

§1.2. What are q-Series and Theta Functions? 6

§1.3. Fundamental Theorems about q-Series and Theta Functions 7

§1.4. Notes 22

Chapter 2. Congruences for $p(n)$ and $\tau(n)$ 27

§2.1. Historical Background 27

§2.2. Elementary Congruences for $\tau(n)$ 28

§2.3. Ramanujan's Congruence $p(5n+4) \equiv 0 \pmod 5$ 31

§2.4. Ramanujan's Congruence $p(7n+5) \equiv 0 \pmod 7$ 39

§2.5. The Parity of $p(n)$ 43

§2.6. Notes 49

Chapter 3. Sums of Squares and Sums of Triangular Numbers 55

§3.1. Lambert Series 55

§3.2. Sums of Two Squares 56

§3.3. Sums of Four Squares 59

§3.4. Sums of Six Squares 63
§3.5. Sums of Eight Squares 67
§3.6. Sums of Triangular Numbers 71
§3.7. Representations of Integers by $x^2 + 2y^2$, $x^2 + 3y^2$, and $x^2 + xy + y^2$ 72
§3.8. Notes 79

Chapter 4. Eisenstein Series 85
§4.1. Bernoulli Numbers and Eisenstein Series 85
§4.2. Trigonometric Series 87
§4.3. A Class of Series from Ramanujan's Lost Notebook Expressible in Terms of P, Q, and R 97
§4.4. Proofs of the Congruences $p(5n + 4) \equiv 0 \pmod 5$ and $p(7n + 5) \equiv 0 \pmod 7$ 102
§4.5. Notes 105

Chapter 5. The Connection Between Hypergeometric Functions and Theta Functions 109
§5.1. Definitions of Hypergeometric Series and Elliptic Integrals 109
§5.2. The Main Theorem 114
§5.3. Principles of Duplication and Dimidiation 120
§5.4. A Catalogue of Formulas for Theta Functions and Eisenstein Series 122
§5.5. Notes 128

Chapter 6. Applications of the Primary Theorem of Chapter 5 133
§6.1. Introduction 133
§6.2. Sums of Squares and Triangular Numbers 134
§6.3. Modular Equations 140
§6.4. Notes 150

Chapter 7. The Rogers–Ramanujan Continued Fraction 153
§7.1. Definition and Historical Background 153

§7.2. The Convergence, Divergence, and Values of $R(q)$ 155
§7.3. The Rogers–Ramanujan Functions 158
§7.4. Identities for $R(q)$ 161
§7.5. Modular Equations for $R(q)$ 166
§7.6. Notes 167

Bibliography 171

Index 185
