Preface	vii
Chapter 1. Random Walk and Discrete Heat Equation	1
§1.1. Simple random walk	1
§1.2. Boundary value problems	14
§1.3. Heat equation	22
§1.4. Expected time to escape	29
§1.5. Space of harmonic functions	34
§1.6. Exercises	40
Chapter 2. Brownian Motion and the Heat Equation	49
§2.1. Brownian motion	49
§2.2. Harmonic functions	58
§2.3. Dirichlet problem	67
§2.4. Heat equation	73
§2.5. Bounded domain	76
§2.6. More on harmonic functions	85
§2.7. Constructing Brownian motion	88
§2.8. Exercises	92
Chapter 3. Martingales	101

§3.1. Examples	101
§3.2. Conditional expectation	108
§3.3. Definition of martingale	112
§3.4. Optional sampling theorem	113
§3.5. Martingale convergence theorem	119
§3.6. Uniform integrability	123
§3.7. Exercises	127
Chapter 4. Fractal Dimension	135
§4.1. Box dimension	135
§4.2. Cantor measure	138
§4.3. Hausdorff measure and dimension	142
§4.4. Exercises	152
Suggestions for Further Reading	155
