Contents

Preface xi

Chapter 1. Introduction 1
§1.1. Elliptic curves 1
§1.2. Modular forms 7
§1.3. L-functions 11
§1.4. Exercises 15

Chapter 2. Elliptic curves 17
§2.1. Why elliptic curves? 17
§2.2. Definition 20
§2.3. Integral points 23
§2.4. The group structure on $E(\mathbb{Q})$ 24
§2.5. The torsion subgroup 32
§2.6. Elliptic curves over finite fields 35
§2.7. The rank and the free part of $E(\mathbb{Q})$ 43
§2.8. Linear independence of rational points 46
§2.9. Descent and the weak Mordell-Weil theorem 49
§2.10. Homogeneous spaces 59
§2.11. Selmer and Sha 66

§2.12. Exercises 69

Chapter 3. Modular curves 77
§3.1. Elliptic curves over $\mathbb{C}$ 77
§3.2. Functions on lattices and elliptic functions 82
§3.3. Elliptic curves and the upper half-plane 84
§3.4. The modular curve $X(1)$ 87
§3.5. Congruence subgroups 90
§3.6. Modular curves 91
§3.7. Exercises 94

Chapter 4. Modular forms 99
§4.1. Modular forms for the modular group 99
§4.2. Modular forms for congruence subgroups 105
§4.3. The Petersson inner product 110
§4.4. Hecke operators acting on cusp forms 111
§4.5. Exercises 118

Chapter 5. L-functions 123
§5.1. The L-function of an elliptic curve 123
§5.2. The Birch and Swinnerton-Dyer conjecture 127
§5.3. The L-function of a modular (cusp) form 135
§5.4. The Taniyama-Shimura-Weil conjecture 137
§5.5. Fermat's last theorem 140
§5.6. Looking back and looking forward 142
§5.7. Exercises 143

Appendix A. PARI/GP and Sage 147
§A.1. Elliptic curves 147
§A.2. Modular forms 154
§A.3. L-functions 156
§A.4. Other Sage commands 158

Appendix B. Complex analysis 159

§B.1. Complex numbers 159
§B.2. Analytic functions 160
§B.3. Meromorphic functions 163
§B.4. The complex exponential function 165
§B.5. Theorems in complex analysis 166
§B.6. Quotients of the complex plane 168
§B.7. Exercises 169

Appendix C. Projective space 171
§C.1. The projective line 171
§C.2. The projective plane 173
§C.3. Over an arbitrary field 174
§C.4. Curves in the projective plane 175
§C.5. Singular and smooth curves 176

Appendix D. The p-adic numbers 179
§D.1. Hensel's lemma 181
§D.2. Exercises 182

Appendix E. Parametrization of torsion structures 185

Bibliography 189
