Preface	xi
Chapter 1. Book Overview	1
§1.1. Behold, the Torus!	1
§1.2. Gluing Polygons	3
§1.3. Drawing on a Surface	5
§1.4. Covering Spaces	8
§1.5. Hyperbolic Geometry and the Octagon	9
§1.6. Complex Analysis and Riemann Surfaces	11
§1.7. Cone Surfaces and Translation Surfaces	13
§1.8. The Modular Group and the Veech Group	14
§1.9. Moduli Space	16
§1.10. Dessert	17
<b>Part 1. Surfaces and Topology</b>	
Chapter 2. Definition of a Surface	21
§2.1. A Word about Sets	21
§2.2. Metric Spaces	22
§2.3. Open and Closed Sets	23
§2.4. Continuous Maps	24

---

§2.5. Homeomorphisms	25
§2.6. Compactness	26
§2.7. Surfaces	27
§2.8. Manifolds	28
Chapter 3. The Gluing Construction	31
§3.1. Gluing Spaces Together	31
§3.2. The Gluing Construction in Action	33
§3.3. The Classification of Surfaces	36
§3.4. The Euler Characteristic	37
Chapter 4. The Fundamental Group	43
§4.1. A Primer on Groups	43
§4.2. Homotopy Equivalence	45
§4.3. The Fundamental Group	46
§4.4. Changing the Basepoint	48
§4.5. Functoriality	49
§4.6. Some First Steps	51
Chapter 5. Examples of Fundamental Groups	53
§5.1. The Winding Number	53
§5.2. The Circle	56
§5.3. The Fundamental Theorem of Algebra	57
§5.4. The Torus	58
§5.5. The 2-Sphere	58
§5.6. The Projective Plane	59
§5.7. A Lens Space	59
§5.8. The Poincaré Homology Sphere	62
Chapter 6. Covering Spaces and the Deck Group	65
§6.1. Covering Spaces	65
§6.2. The Deck Group	66
§6.3. A Flat Torus	67

---

§6.4. More Examples	69
§6.5. Simply Connected Spaces	70
§6.6. The Isomorphism Theorem	71
§6.7. The Bolzano–Weierstrass Theorem	72
§6.8. The Lifting Property	73
§6.9. Proof of the Isomorphism Theorem	74
Chapter 7. Existence of Universal Covers	79
§7.1. The Main Result	80
§7.2. The Covering Property	82
§7.3. Simple Connectivity	84
 <b>Part 2. Surfaces and Geometry</b>	
Chapter 8. Euclidean Geometry	87
§8.1. Euclidean Space	87
§8.2. The Pythagorean Theorem	90
§8.3. The X Theorem	91
§8.4. Pick’s Theorem	92
§8.5. The Polygon Dissection Theorem	96
§8.6. Line Integrals	98
§8.7. Green’s Theorem for Polygons	100
Chapter 9. Spherical Geometry	103
§9.1. Metrics, Tangent Planes, and Isometries	103
§9.2. Geodesics	105
§9.3. Geodesic Triangles	107
§9.4. Convexity	110
§9.5. Stereographic Projection	111
§9.6. The Hairy Ball Theorem	113
Chapter 10. Hyperbolic Geometry	115
§10.1. Linear Fractional Transformations	115
§10.2. Circle Preserving Property	116

---

§10.3.	The Upper Half-Plane Model	118
§10.4.	Another Point of View	121
§10.5.	Symmetries	121
§10.6.	Geodesics	123
§10.7.	The Disk Model	125
§10.8.	Geodesic Polygons	127
§10.9.	Classification of Isometries	130
Chapter 11.	Riemannian Metrics on Surfaces	133
§11.1.	Curves in the Plane	133
§11.2.	Riemannian Metrics on the Plane	134
§11.3.	Diffeomorphisms and Isometries	135
§11.4.	Atlases and Smooth Surfaces	136
§11.5.	Smooth Curves and the Tangent Plane	137
§11.6.	Riemannian Surfaces	139
Chapter 12.	Hyperbolic Surfaces	143
§12.1.	Definition	143
§12.2.	Gluing Recipes	145
§12.3.	Gluing Recipes Lead to Surfaces	147
§12.4.	Some Examples	149
§12.5.	Geodesic Triangulations	150
§12.6.	Riemannian Covers	152
§12.7.	Hadamard's Theorem	154
§12.8.	The Hyperbolic Cover	156
<b>Part 3. Surfaces and Complex Analysis</b>		
Chapter 13.	A Primer on Complex Analysis	163
§13.1.	Basic Definitions	163
§13.2.	Cauchy's Theorem	165
§13.3.	The Cauchy Integral Formula	167
§13.4.	Differentiability	168

---

§13.5.	The Maximum Principle	170
§13.6.	Removable Singularities	171
§13.7.	Power Series	172
§13.8.	Taylor Series	174
Chapter 14.	Disk and Plane Rigidity	177
§14.1.	Disk Rigidity	177
§14.2.	Liouville's Theorem	179
§14.3.	Stereographic Projection Revisited	181
Chapter 15.	The Schwarz–Christoffel Transformation	183
§15.1.	The Basic Construction	184
§15.2.	The Inverse Function Theorem	185
§15.3.	Proof of Theorem 15.1	186
§15.4.	The Range of Possibilities	188
§15.5.	Invariance of Domain	189
§15.6.	The Existence Proof	190
Chapter 16.	Riemann Surfaces and Uniformization	195
§16.1.	Riemann Surfaces	195
§16.2.	Maps Between Riemann Surfaces	197
§16.3.	The Riemann Mapping Theorem	199
§16.4.	The Uniformization Theorem	201
§16.5.	The Small Picard Theorem	202
§16.6.	Implications for Compact Surfaces	203
 <b>Part 4. Flat Cone Surfaces</b>		
Chapter 17.	Flat Cone Surfaces	207
§17.1.	Sectors and Euclidean Cones	207
§17.2.	Euclidean Cone Surfaces	208
§17.3.	The Gauss–Bonnet Theorem	209
§17.4.	Translation Surfaces	211
§17.5.	Billiards and Translation Surfaces	213

---

§17.6.	Special Maps on a Translation Surface	217
§17.7.	Existence of Periodic Billiard Paths	219
Chapter 18.	Translation Surfaces and the Veech Group	221
§18.1.	Affine Automorphisms	221
§18.2.	The Differential Representation	223
§18.3.	Hyperbolic Group Actions	224
§18.4.	Proof of Theorem 18.1	226
§18.5.	Triangle Groups	228
§18.6.	Linear and Hyperbolic Reflections	229
§18.7.	Behold, The Double Octagon!	232
 <b>Part 5. The Totality of Surfaces</b>		
Chapter 19.	Continued Fractions	239
§19.1.	The Gauss Map	239
§19.2.	Continued Fractions	241
§19.3.	The Farey Graph	242
§19.4.	Structure of the Modular Group	244
§19.5.	Continued Fractions and the Farey Graph	245
§19.6.	The Irrational Case	247
Chapter 20.	Teichmüller Space and Moduli Space	251
§20.1.	Parallelograms	251
§20.2.	Flat Tori	252
§20.3.	The Modular Group Again	254
§20.4.	Moduli Space	256
§20.5.	Teichmüller Space	258
§20.6.	The Mapping Class Group	260
Chapter 21.	Topology of Teichmüller Space	263
§21.1.	Pairs of Pants	263
§21.2.	Pants Decompositions	265
§21.3.	Special Maps and Triples	267

---

§21.4. The End of the Proof	269
<b>Part 6. Dessert</b>	
Chapter 22. The Banach–Tarski Theorem	275
§22.1. The Result	275
§22.2. The Schroeder–Bernstein Theorem	276
§22.3. The Doubling Theorem	278
§22.4. Depleted Balls	279
§22.5. The Depleted Ball Theorem	280
§22.6. The Injective Homomorphism	282
Chapter 23. Dehn’s Dissection Theorem	287
§23.1. The Result	287
§23.2. Dihedral Angles	288
§23.3. Irrationality Proof	289
§23.4. Rational Vector Spaces	290
§23.5. Dehn’s Invariant	291
§23.6. Clean Dissections	292
§23.7. The Proof	294
Chapter 24. The Cauchy Rigidity Theorem	295
§24.1. The Main Result	295
§24.2. The Dual Graph	296
§24.3. Outline of the Proof	297
§24.4. Proof of Lemma 24.3	298
§24.5. Proof of Lemma 24.2	301
§24.6. Euclidean Intuition Does Not Work	303
§24.7. Proof of Cauchy’s Arm Lemma	304
Bibliography	309
Index	311
