# Contents

Preface	xi
Chapter 1. Introduction	1
Chapter 2. Designs	11
2.1. Incidence structures	11
2.2. $t$ -Designs	14
2.3. Affine planes	20
2.4. Symmetric designs	26
2.5. Projective geometry	30
Chapter 3. Automorphisms of Designs	37
3.1. Group actions	37
3.2. Automorphisms of symmetric designs	40
Chapter 4. Introducing Difference Sets	45
4.1. Definition and examples	46
4.2. Difference sets and designs	54
4.3. Integral group ring	59
4.4. Equivalence	65

---

Chapter 5. Bruck-Ryser-Chowla Theorem	71
5.1. The BRC Theorem	72
5.2. Proof of BRC for $v$ odd	76
5.3. Partial converse and extension of BRC	84
Chapter 6. Multipliers	87
6.1. Definition and examples	87
6.2. Existence of numerical multipliers	91
6.3. Multipliers fix $sD$	94
6.4. Using multipliers	96
6.5. Multipliers in non-cyclic groups	99
Chapter 7. Necessary Group Conditions	103
7.1. Intersection numbers	103
7.2. Turyn's exponent bound	112
7.3. Dillon's dihedral trick	116
Chapter 8. Difference Sets from Geometry	121
8.1. Singer difference sets	121
8.2. Turyn's construction	125
8.3. McFarland difference sets	129
Chapter 9. Families from Hadamard Matrices	135
9.1. Hadamard matrices	135
9.2. Paley-Hadamard family: $v = 4n - 1$	141
9.3. Hadamard family: $v = 4n$	155
Chapter 10. Representation Theory	167
10.1. Definitions and examples	167
10.2. Equivalent representations	177
10.3. Maschke's Theorem	179
10.4. Representations and difference sets	191
Chapter 11. Group Characters	197
11.1. Definitions and examples	198

---

11.2.	The Fundamental Theorem	201
11.3.	Proof of the Fundamental Theorem	209
11.4.	Characters and difference sets	220
11.5.	Character tables	228
Chapter 12.	Using Algebraic Number Theory	233
12.1.	Why algebraic number theory?	233
12.2.	Definitions and basic facts	235
12.3.	Seeking difference sets	240
12.4.	Proving Turyn's exponent bound	247
Chapter 13.	Applications	253
13.1.	Binary sequences	253
13.2.	Imaging with coded masks	257
13.3.	Error correcting codes	261
13.4.	Quantum information and MUBs	263
Appendix A.	Background	267
Appendix B.	Notation	273
Appendix C.	Hints and Solutions to Selected Exercises	277
	Bibliography	287
	Index	293
	Index of Parameters	297
