Preface	ix
A Reader's Guide	xiii
Chapter 0. An Infinity of Primes	1
Chapter 1. Stirling's Formula	5
§1.1. Asymptotic Estimation of an Integral	5
§1.2. Approximating Sums by Trapezoids	13
§1.3. Combining Forces to Estimate the Error	16
§1.4. Estimating the Integral More Accurately	18
§1.5. An Application to Random Walks	21
Chapter 2. Big Oh, Little Oh, and All That	27
§2.1. The Language of Asymptotics	28
§2.2. ... and How to Use It	29
§2.3. Little Oh One	31
§2.4. Little Fleas and Littler Fleas: The Strange Hierarchy of Asymptopia	31
§2.5. Little Oh One in the Exponent	33
§2.6. Inverting Functions	34
§2.7. Taylor Series	35

---

Chapter 3. Integration in Asymptopia	37
§3.1. The Gaussian Tail	38
§3.2. High Trigonometric Powers	40
§3.3. An Easy Integral	43
§3.4. Integrals with logs	44
Chapter 4. From Integrals to Sums	47
§4.1. Approximating Sums by Integrals	48
§4.2. The Harmonic Numbers	51
Chapter 5. Asymptotics of Binomial Coefficients $\binom{n}{k}$	57
§5.1. $k$ Relatively Small	57
§5.2. Some Exercises	60
§5.3. $k$ Linear in $n$	63
§5.4. At and Near the Middle Binomial Coefficient	66
§5.5. The Binomial Distribution	68
§5.6. The Binomial Tail	68
Chapter 6. Unicyclic Graphs	71
§6.1. Rooted Trees	72
§6.2. Rooted Trees to Prüfer Sequences	73
§6.3. Prüfer Sequences to Rooted Trees	79
§6.4. Proof of Bijection	82
§6.5. Rooted Forests	83
§6.6. Prüfer Sequences to Rooted Forests	83
§6.7. ... and Back Again	86
§6.8. An Exact Formula for Unicyclic Graphs	88
§6.9. Counting Unicyclic Graphs in Asymptopia	90
Chapter 7. Ramsey Numbers	93
§7.1. Initial Erdős Argument	93
§7.2. Deletion	94
§7.3. Lovász Local Lemma	95

<b>Contents</b>	vii
§7.4. Computations for $R(k, k)$	96
§7.5. Asymmetrical Ramsey Numbers	98
§7.6. Application to $R(3, l)$	100
Chapter 8. Large Deviations	103
§8.1. The Chernoff Bound	103
§8.2. The Gaussian Tail	105
§8.3. The Gaussian Paradigm I	105
§8.4. Heads Minus Tails	107
§8.5. . . . and the Central Limit Theorem	109
§8.6. The Binomial Distribution	109
§8.7. The Gaussian Paradigm II	111
Chapter 9. Primes	115
§9.1. Fun with Primes	116
§9.2. Prime Number Theorem—Lower Bound	118
§9.3. Prime Number Theorem—Upper Bound	119
§9.4. Prime Number Theorem with Constant	120
§9.5. Telescoping	123
Chapter 10. Asymptotic Geometry	125
§10.1. Small Triangles	125
§10.2. The Convex Hull of $n$ Random Points	129
Chapter 11. Algorithms	137
§11.1. Recurrences	137
§11.2. Multiplying Large Numbers	141
§11.3. Multiplying Large Matrices	142
§11.4. Merge Sort	144
§11.5. The Sorting Game	145
§11.6. Quicksort	148
Chapter 12. Potpourri	151
§12.1. The Law of the Iterated Logarithm	151

---

§12.2. The Amazing Poisson Distribution	159
§12.3. The Coupon Collector Problem	165
§12.4. The Threshold of Connectivity	167
§12.5. Tower and Log Star	170
Chapter 13. Really Big Numbers!	173
Bibliography	179
Index	181
