Preface	ix
Chapter 1. Symmetric Polynomials, the Monomial Symmetric Polynomials, and Symmetric Functions	1
§1.1. Symmetric Polynomials	2
§1.2. The Monomial Symmetric Polynomials	7
§1.3. Symmetric Functions	10
§1.4. Problems	19
§1.5. Notes	21
Chapter 2. The Elementary, Complete Homogeneous, and Power Sum Symmetric Functions	23
§2.1. The Elementary Symmetric Functions	23
§2.2. The Complete Homogeneous Symmetric Functions	38
§2.3. The Power Sum Symmetric Functions	44
§2.4. Problems	49
Chapter 3. Interlude: Evaluations of Symmetric Functions	53
§3.1. Symmetric Function Identities	53
§3.2. Binomial Coefficients	57
§3.3. Stirling Numbers of the First and Second Kinds	60

§3.4. q -Binomial Coefficients	64
§3.5. Problems	71
§3.6. Notes	73
Chapter 4. Schur Polynomials and Schur Functions	75
§4.1. Schur Functions and Semistandard Tableaux	75
§4.2. Schur Polynomials as Ratios of Determinants	89
§4.3. Problems	111
§4.4. Notes	116
Chapter 5. Interlude: A Rogues' Gallery of Symmetric Functions	119
§5.1. Skew Schur Functions	119
§5.2. Stable Grothendieck Polynomials	129
§5.3. Dual Stable Grothendieck Polynomials	137
§5.4. The Chromatic Symmetric Function	144
§5.5. Problems	153
§5.6. Notes	156
Chapter 6. The Jacobi–Trudi Identities and an Involution on Λ	157
§6.1. The First Jacobi–Trudi Identity	157
§6.2. The Second Jacobi–Trudi Identity	171
§6.3. The Involution ω	178
§6.4. Problems	183
§6.5. Notes	189
Chapter 7. The Hall Inner Product	191
§7.1. Inner Products on Λ_k	191
§7.2. The Hall Inner Product and Cauchy's Formula	196
§7.3. The Hall Inner Product on the Power Sum Symmetric Functions	201
§7.4. Problems	206
§7.5. Notes	207

Chapter 8. The Robinson–Schensted–Knuth Correspondence	209
§8.1. RSK Insertion: Constructing $P(\pi)$	210
§8.2. Constructing $Q(\pi)$	223
§8.3. Implementing RSK with Growth Diagrams	232
§8.4. Problems	242
§8.5. Notes	245
Chapter 9. Special Products Involving Schur Functions	247
§9.1. The Pieri Rules	248
§9.2. The Murnaghan–Nakayama Rule	256
§9.3. Problems	269
Chapter 10. The Littlewood–Richardson Rule	271
§10.1. Products of Tableaux	272
§10.2. Knuth Equivalence	278
§10.3. The Relationship Between P and word	285
§10.4. The Littlewood–Richardson Rule	291
§10.5. Problems	303
§10.6. Notes	307
Appendix A. Linear Algebra	309
§A.1. Fields and Vector Spaces	309
§A.2. Bases and Linear Transformations	312
§A.3. Inner Products and Dual Bases	316
§A.4. Problems	320
Appendix B. Partitions	323
§B.1. Partitions and a Generating Function	323
§B.2. Problems	325
Appendix C. Permutations	327
§C.1. Permutations as Bijections	327
§C.2. Determinants and Permutations	331
§C.3. Problems	334

Bibliography 337
