# Index

## $C^l$

- norm, 213
- spaces, 212

## 4-

- momentum, 135
- velocity, 132

- Arzelá Ascoli Theorem, 213
- asymptotically Euclidean metric, 190
- atlas, 5, 17

## Bianchi identity

- first, 84
- second, 85

- big bang, 187
- black hole, 185
- boost, 130

## causality, 132

- center of mass, 204
- chart, 17

## Christoffel symbols, 34

- clock, 132
- commutator, 47

## conformal

- equivalence, 180
- factor, 180
- flatness, 190
- connection, 52
- coefficients, 52

## Levi-Civita, 54

- torsion-free, 54

## constraint equations, 157

## continuity equation, 134

## coordinatization, 5

## cosmological constant, 154

## covariant

- differentiation, 54, 76
- tensor field, 62

## covector field, 60, 61

## curvature

- tensor, 81
- extrinsic, 121, 155
- operator, 80, 81
- Ricci, 109
- scalar, 109
- sectional, 100

## deviation vector field, 93

## Dirac delta function, 221

## directional derivative, 45

## distance, 22, 23

## divergence, 67, 152

- theorem, 70

## dual, 65

## effective potential, 168, 171

## Einstein

- equation, 151, 154
- tensor, 153

- energy functional, 31  
 energy-momentum, 135  
 equicontinuity, 213  
 Euler's equation, 134  
 evolution equations, 157  
 exponential map, 90  
  
 FLRW space-times, 187  
 function space, 212  
  
 Gauss  
   (Divergence) Theorem, 68  
   -Bonnet Theorem, 116, 119  
   Lemma, 93  
   Theorem, 115  
   Theorema Egregium, 120  
 geodesic, 34  
   completeness, 35  
   equations, 34  
   incompleteness, 187  
   normal coordinates, 90  
   polar coordinates, 92  
   time-like, 150  
 gradient vector field, 67  
 gravitational  
   field, 144, 145  
   potential, 144  
 great circle, 23  
 Green's Representation Formula,  
   146, 204  
  
 Hessian, 78  
 horizon, 185  
 Hubble parameter, 188  
 hyperbolic  
   geometry, 40  
   space, 37  
   trigonometric functions, 39  
  
 index  
   contraction, 65  
   notation, 63  
 inertial  
   coordinates, 91  
   observer, 124  
 initial  
   data, 158  
   value formulation, 155  
 integration by parts, 71  
  
 interval, 125  
 inversion, 10, 194  
 isometry, 36, 37, 55  
  
 Jacobi  
   equation, 96  
   operator, 151  
   vector field, 96  
  
 Kepler's laws, 168  
 Kruskal-Szekeres extension, 183  
  
 Laplacian, 71  
 lapse and shift, 161  
 length contraction, 130  
 length functional, 30  
 Lie bracket, 47  
 light-cone, 124  
 line element, 3  
 line element, 5, 20  
   Euclidean line element, 4  
   spherical line element, 8, 10  
 Lorentz  
   manifold, 149  
   signature, 127  
   transformations, 130  
 lowering an index, 65  
  
 manifold, 16  
   compact, 26  
   complete, 24  
   path connected, 23  
 mass, 135, 224  
   -energy density, 232  
   ADM, 225  
   conservation, 134  
   density, 133, 219  
   effective, 233  
   mass-energy, 135  
   quasi-local, 234  
 maximum principle, 71  
 minimal surface, 189  
 Minkowski  
   inner-product, 125  
   space-time, 126  
 momentum, 132  
   4-momentum, 135  
   conservation, 134  
   density, 133

- Newtonian limit, 131
- non-degenerate inner-product, 126
- null
  - geodesic, 150
  - vector, 126
- parallel, 54
  - transport, 51, 55
- parametrization, 5
- perfect fluid, 137, 152
- perihelion advance, 175
- point-source, 218
- Poisson equation, 146
  - relativistic, 193
- pressure, 134
- projective spaces, 10
- pseudo-orthonormal basis, 127
- pseudo-Riemannian manifold, 149
- raising an index, 66
- regularity, 201, 203
- relativistic Poisson problem, 193
- relativity
  - general, 148
  - principles, 123
  - special, 123
