Foreword	xi
Preface	xiii
Background information	xiv
Structure of the book	xiv
Acknowledgments	xv
Chapter 1. Plane Curves	1
§1.1. Continuous curves	3
§1.2. Smooth curves, tangent vectors, and tangent lines	16
§1.3. Reparametrization and arc length	22
§1.4. Normal and tangent vector fields	28
§1.5. Curvature and Frenet equations	33
§1.6. Geometric interpretation of the curvature	41
§1.7. Curves in the complex plane	46
§1.8. The fundamental theorem of plane curves	52
§1.9. Local canonical form	55
§1.10. Parallel curves	58
§1.11. Evolutes and involutes	65
§1.12. Exercises	73

Chapter 2. Winding Number	97
§2.1. The angle function	97
§2.2. Winding number of a closed curve	106
§2.3. Properties of the winding number	108
§2.4. Winding number of deformable curves	117
§2.5. Calculation of winding and intersection numbers	122
§2.6. Applications	132
§2.7. Exercises	136
Chapter 3. Rotation Index	143
§3.1. Rotation index	143
§3.2. The total curvature	147
§3.3. Rotation indices of simple closed curves	150
§3.4. The total absolute curvature	155
§3.5. Exercises	160
Chapter 4. Jordan Curve Theorem	165
§4.1. Jordan curve theorem	166
§4.2. Exercises	179
Chapter 5. Isoperimetric Inequality	181
§5.1. The classical isoperimetric inequality	181
§5.2. Bonnesen isoperimetric inequality	190
§5.3. Exercises	191
Chapter 6. Convex Curves	195
§6.1. Closed and convex curves	197
§6.2. Schur theorem	214
§6.3. Curves of constant width	218
§6.4. Length and area of convex curves	230
§6.5. Gage isoperimetric inequality	240
§6.6. Exercises	243

Chapter 7. The Four-Vertex Theorem	251
§7.1. The four-vertex theorem for convex curves	254
§7.2. A generalization of the four-vertex theorem	260
§7.3. The converse of the four-vertex theorem	264
§7.4. Exercises	266
Chapter 8. Curve-Shortening Flow	269
§8.1. Introduction and basic properties of the flow	269
§8.2. Convex curves under the curve-shortening flow	284
§8.3. The theorems of Gage and Hamilton	316
§8.4. Convergence of the curvature functions of convex curves	327
§8.5. Evolution of simple curves: Grayson theorem	335
§8.6. Exercises	359
Appendix A. The Class C^∞ Convergence of the Curvature Function Under the Curve-Shortening Flow	363
Appendix B. Answers to Selected Exercises	385
§B.1. Chapter 1 - Page 73	385
§B.2. Chapter 2 - Page 136	394
§B.3. Chapter 3 - Page 160	396
§B.4. Chapter 4 - Page 179	397
§B.5. Chapter 5 - Page 191	399
§B.6. Chapter 6 - Page 243	401
§B.7. Chapter 7 - Page 266	404
§B.8. Chapter 8 - Page 359	405
Bibliography	409
Index	413
