Preface	ix
Chapter 1. Markov Chains	1
§1.1. Definition	1
§1.2. Laplacian and harmonic functions	7
§1.3. Markov chain with boundary	8
§1.4. Green's function	13
§1.5. An alternative formulation	16
§1.6. Continuous time	20
Further Reading	21
Chapter 2. Loop-Erased Random Walk	23
§2.1. Loop erasure	23
§2.2. Loop-erased random walk	25
§2.3. Determinant of the Laplacian	29
§2.4. Laplacian random walk	32
§2.5. Putting the loops back on the path	36
§2.6. Wilson's algorithm	37
Further Reading	43
Chapter 3. Loop Soups	45

§3.1. Introduction	45
§3.2. Growing loop at a point	46
§3.3. Growing loop configuration in A	50
§3.4. Rooted loop soup	54
§3.5. (Unrooted) random walk loop measure	55
§3.6. Local time and currents	58
§3.7. Negative weights	63
§3.8. Continuous time	65
Further Reading	66
Chapter 4. Random Walk in \mathbb{Z}^d	67
§4.1. Introduction	67
§4.2. Local central limit theorem	70
§4.3. Green's function	76
§4.4. Harmonic functions	81
§4.5. Capacity for $d \geq 3$	93
§4.6. Capacity in two dimensions	101
Further reading	102
Chapter 5. LERW and Spanning Trees on \mathbb{Z}^d	103
§5.1. LERW in \mathbb{Z}^d	103
§5.2. Marginal distributions for UST in \mathbb{Z}^d	108
§5.3. Uniform spanning tree (UST) in \mathbb{Z}^d	117
§5.4. The dual lattice in \mathbb{Z}^2	122
§5.5. The uniform spanning tree (UST) in \mathbb{Z}^2	130
Further Reading	131
Chapter 6. Gaussian Free Field	133
§6.1. Introduction	133
§6.2. Multivariate normal distribution	133
§6.3. Gaussian fields coming from Markov chains	139
§6.4. A Gibbs measure perspective	143
§6.5. One-dimensional GFF	148

Contents	vii
§6.6. Square of the field	149
Further reading	152
Chapter 7. Scaling Limits	153
§7.1. The idea of a scaling limit	153
§7.2. Brownian motion	156
§7.3. Conformal invariance in two dimensions	159
§7.4. Brownian loop soup	161
§7.5. Scaling limit for LERW	164
§7.6. Loewner differential equation	169
§7.7. Self-avoiding walk: $c = 0$	172
§7.8. Continuous GFF for $d = 1, 2$	173
Further Reading	177
Appendix A. Some Background and Extra Topics	179
§A.1. Borel-Cantelli lemma	179
§A.2. Second moment method	180
§A.3. Compound Poisson process	182
§A.4. Negative binomial process	184
§A.5. Increasing jump processes	187
§A.6. Gamma process	189
§A.7. Lévy processes	192
Bibliography	195
Index	197
