Preface	ix
A Brief History	xi
Part 1. Isometric Embedding of Riemannian Manifolds	1
Chapter 1. Fundamental Theorems	3
1.1. Local Isometric Embedding of Analytic Metrics	4
1.2. Local Isometric Embedding of Smooth Metrics	9
1.3. Global Isometric Embedding of Smooth Metrics	16
Notes	31
Chapter 2. Surfaces in Low Dimensional Euclidean Spaces	33
2.1. Surfaces in \mathbb{R}^3	33
2.2. Isometric Immersions of Surfaces of Constant Curvature	38
2.3. Isometric Immersions of Surfaces in \mathbb{R}^4	40
Notes	42
Part 2. Local Isometric Embedding of Surfaces in \mathbb{R}^3	43
Chapter 3. Basic Equations	45
3.1. The Darboux Equation	45
3.2. The Gauss-Codazzi System	47
3.3. The Rozhdestvenskii-Poznyak System	51
Notes	53
Chapter 4. Nonzero Gauss Curvature	55
4.1. Positive Gauss Curvature	56
4.2. Negative Gauss Curvature	58
4.3. Appendix: Sobolev Spaces	63
4.4. Appendix: Some Lemmas	64
4.5. Appendix: Symmetric Hyperbolic Linear Differential Systems	68
Notes	70
Chapter 5. Gauss Curvature Changing Sign Cleanly	71
5.1. The Setting	71
5.2. Iterations	74
5.3. Symmetric Positive Linear Differential Systems	79
Notes	86

Chapter 6. Nonnegative Gauss Curvature	87
6.1. The Setting	87
6.2. A Priori Estimates	90
6.3. Iterations	96
Notes	107
Chapter 7. Nonpositive Gauss Curvature	109
7.1. The Setting	110
7.2. A Priori Estimates for the Linearized System	116
7.3. A Priori Estimates for the Cauchy Problem	124
7.4. Iterations	130
7.5. Remarks on the Hypothesis	136
Notes	141
Part 3. Global Isometric Embedding of Surfaces in \mathbb{R}^3	143
Chapter 8. Deformation of Surfaces	145
8.1. The Rigidity of Surfaces	145
8.2. The Infinitesimal Rigidity of Surfaces	154
8.3. A Positive Disk of Not Infinitesimal Rigidity	158
Notes	165
Chapter 9. The Weyl Problem	167
9.1. Geometric Preliminaries	168
9.2. Openness	171
9.3. Closedness	180
Notes	188
Chapter 10. Complete Negatively Curved Surfaces	191
10.1. Nonexistence of Isometric Immersions	192
10.2. Existence of Isometric Immersions, Part I	201
10.3. Existence of Isometric Immersions, Part II	214
Notes	224
Chapter 11. Boundary Value Problems	225
11.1. The Dirichlet Problem with Planar Boundaries	226
11.2. The Darboux System and Interior C^2 -Estimates	229
11.3. Global C^2 -Estimates	237
Notes	247
Bibliography	249
Index	259
