Preface	xiii
Chapter 1. Transformation Groups	1
1.1. Introduction	1
1.2. (Locally) Proper G -spaces	4
1.3. Fiber bundles	6
1.4. Classifying spaces	9
1.5. Borel spaces and classifying spaces	10
1.6. Tubular neighborhoods and slices	11
1.7. Existence of slices	15
1.8. Cohomology manifolds and the Smith theorems	18
1.9. Actions of $G \cdot \Pi$ (G Lie group, Π discrete)	20
Chapter 2. Group Actions and the Fundamental Group	23
2.1. Covering spaces	23
2.2. Lifting group actions to covering spaces	26
2.3. Lifting an action of G when G has a fixed point	28
2.4. Evaluation homomorphism	31
2.5. Lifting connected group actions	32
2.6. Example (Semi-free S^1 -actions on 3-manifolds)	35
2.7. Lifting the slice representation	39
2.8. Locally injective actions	42
Chapter 3. Actions of Compact Lie Groups on Manifolds	47
3.1. Actions of compact Lie groups on aspherical manifolds	47
3.2. Actions of compact Lie groups on admissible manifolds	54
3.3. Compact Lie group actions on spaces which map into $K(\Gamma, 1)$	59
3.4. Manifolds with few or no periodic homeomorphisms	65
3.5. Injective torus actions	66
Chapter 4. Definition of Seifert Fibring	69
4.1. Examples	69
4.2. $\text{TOP}_G(P)$, the group of weak G -equivalences	73
4.3. Seifert fiberings modeled on a principal G -bundle	78
4.4. The topology and geometry of the fibers	81
4.5. Examples with Π discrete	83
4.6. The Seifert Construction	91
Chapter 5. Group Cohomology	95
5.1. Introduction	95
5.2. Group extensions	95

5.3.	Pullback and pushout of short exact sequences	97
5.4.	Extensions with Abelian kernel A and $H^2(Q; A)$	100
5.5.	Central extensions	102
5.6.	Extensions with non-Abelian kernel G and $H^2(Q; \mathcal{Z}(G))$	104
5.7.	$H^1(Q; C)$ with a non-Abelian C	105
Chapter 6.	Lie Groups	109
6.1.	Introduction	109
6.2.	Nilpotent Lie groups	111
6.3.	Solvable Lie groups	114
6.4.	Semisimple Lie groups	115
Chapter 7.	Seifert Fiber Space Construction for $G \times W$	119
7.1.	Introduction	119
7.2.	Cohomological criteria	120
7.3.	Main Construction Theorem for $\text{TOP}_G(G \times W)$	122
7.4.	The meaning of existence, uniqueness and rigidity	123
7.5.	$H^p(Q; M(W, \mathbb{R}^k)) = 0, p > 0$	127
7.6.	Proof of the Construction Theorem	131
7.7.	When is θ injective?	135
7.8.	Smooth case	137
Chapter 8.	Generalization of Bieberbach's Theorems	139
8.1.	Bieberbach's theorems	139
8.2.	Proof of Bieberbach's theorems	139
8.3.	The First Bieberbach Theorem	143
8.4.	The Second Bieberbach Theorem	151
8.5.	The Third Bieberbach Theorem	156
Chapter 9.	Seifert Manifolds with $\Gamma \backslash G/K$ -Fiber	159
9.1.	Introduction	159
9.2.	The group $\text{TOP}_{G,K}(G/K \times W)$	160
9.3.	When $N_G(K) = K$ and $\text{Aut}^0(G, K) = 1$	164
9.4.	Symmetric spaces of noncompact type	166
9.5.	Solvmanifolds	172
Chapter 10.	Locally Injective Seifert Fiberings with Torus Fibers	179
10.1.	Introduction	179
10.2.	When does $E(P, Q)$ split?	187
10.3.	From local to global: $H^*(Q; \mathcal{T}^k)$ and $H^*(Q; \mathcal{Z}^k)$	190
10.4.	The product case, $\mathbb{R}^k \times W$	198
10.5.	Some aspects of the $'E^{p,q}$ -spectral sequence	201
Chapter 11.	Applications	205
11.1.	Existence of closed $K(\Pi, 1)$ -manifolds	206
11.2.	Rigidity of Seifert fibering	210
11.3.	Lifting problem for homotopy classes	216
11.4.	Polynomial structures for solvmanifolds	227
11.5.	Applications to fixed-point theory	231

11.6.	Homologically injective torus operations	236
11.7.	Maximal torus actions	248
11.8.	Toral rank of spherical space forms	265
Chapter 12.	Seifert Fiberings with Compact Connected Q	269
12.1.	Introduction	269
12.2.	Lifting Q -actions	269
12.3.	Lifting Q -actions (for connected Q)	271
12.4.	Examples	278
Chapter 13.	Deformation Spaces	283
13.1.	Uniformizing groups	283
13.2.	$\widetilde{\text{PSL}}(2, \mathbb{R})$ -geometry	284
13.3.	Lorentz structures and $\widetilde{\text{PSL}}(2, \mathbb{R})$ -geometry	288
13.4.	Deformation spaces for $\widetilde{\text{PSL}}(2, \mathbb{R})$ -geometry	290
13.5.	Deformation spaces for Nil-geometry	296
Chapter 14.	S^1 -actions on 3-dimensional Manifolds	299
14.1.	Introduction	299
14.2.	S^1 -actions on 3-manifolds	302
14.3.	S^1 -actions on 3-manifolds as Seifert fiberings	304
14.4.	The classification of S^1 -actions on closed aspherical 3-manifolds	309
14.5.	The classification of S^1 -actions with fixed points on 3-manifolds	312
14.6.	A complete set of invariants	314
14.7.	The Euler number	318
14.8.	$\Gamma \backslash G$ as 3-dimensional Seifert manifolds	322
14.9.	$H_1(M; \mathbb{Z})$	329
14.10.	Injective holomorphic Seifert fiberings	331
14.11.	Brieskorn complete intersections	335
14.12.	Generalized Seifert 3-manifolds as local $\text{SO}(2)$ -actions	338
14.13.	A complete set of invariants for the 3-dimensional Seifert fiberings	344
14.14.	Historical remarks	348
Chapter 15.	Classification of Seifert 3-manifolds via equivariant cohomology	353
15.1.	$H^2(Q; \mathbb{Z}^k)$ and codimension-2 injective actions	353
15.2.	A presentation for $H^2(Q; \mathcal{Z})$	356
15.3.	3-dimensional spherical space forms	366
15.4.	Seifert fiberings with Q Euclidean crystallographic	374
15.5.	Seifert fiberings with Q hyperbolic	376
15.6.	Equivariant classification	377
15.7.	An Illustration	377
	Bibliography	383
	Index	393
