

# Contents

Introduction and Standard Notation	1
<b>Part 1. Idealizer Rings</b>	<b>5</b>
Chapter 1. Basic Idealizers	7
1. Idealizers and Endomorphisms	7
2. Subidealizers of Generative Right Ideals	9
3. Idealizers of Isomaximal and Semimaximal Right Ideals	12
4. Basic Idealizers	14
5. Extensions of Simple Modules in Idealizers	22
Chapter 2. Iterated and Multichain Idealizers	27
6. Iterated Basic Idealizers	27
7. 2-step Iterated Basic Idealizers	32
8. Multichain Idealizers	35
9. Triangular Matrix Rings	41
10. Notes on Chapters 1 and 2	45
<b>Part 2. HNP Rings</b>	<b>47</b>
Chapter 3. Basic Structure	49
11. Introduction and Examples	49
12. Preliminary Module Theory	52
13. Overrings and Simple Modules	57
14. Right Finite Overrings and Idealizer Rings	61
15. Successors of Simple Modules; Factor Rings	65
16. Uniserial Modules	68
17. Right-Left Symmetry: Duality and Transpose	70
Chapter 4. Towers	77
18. Finiteness Results	77
19. Towers of Simple Modules	80
20. Idealizers and Tower Examples	82
21. Right Versus Left Towers	84
22. Cycles of Maximal Ideals; Multiplicative Ideal Theory	85
23. Types of HNP Rings	89
24. Injective Modules	91
25. Examples of Towers: Arbitrary Case	96
26. Notes on Chapters 3 and 4	109

Chapter 5. Integral Overrings	113
27. Simple Modules Killed	113
28. Simple Modules Merged	118
29. $R$ -Simple Images	123
30. Dedekind Closures	125
31. Serial Factor Rings	128
Chapter 6. Invariants for Finitely Generated Projective Modules	131
32. Rank and Merging	131
33. Genus	138
34. Cancellation	141
35. Ideal Class Group; Steinitz Class; Main Theorem	145
36. Notes on Chapters 5 and 6	151
Chapter 7. Applications of Invariants	153
37. Direct Summands	153
38. Number of Generators	154
39. Unique Decompositions	157
40. Semilocal HNP Rings	164
41. Modules of Finite Length	166
42. Stacked Decompositions	169
43. Infinitely Generated Torsion Modules (short survey)	172
44. Notes on Chapter 7	172
Chapter 8. Infinitely Generated Projective Modules	175
45. Genus, Pregenus, Notation	175
46. Main Structure Theorems	183
47. Direct Sums	189
48. Notes on Chapter 8	190
Appendix. Related Topics	193
49. Projective Modules and their Images	193
50. Artinian Serial Rings	198
51. Artinian Principal Ideal Rings	207
52. Equivalent Functors	210
53. Ext and Tor	211
54. Open Problems	216
Bibliography	219
Index of Symbols	223
Index of Terminology	225
