Introduction	1
Part 1. Elliptic Equations and Systems	7
Chapter 1. Prerequisites on Operators Acting into Finite Dimensional Spaces	9
1.1. Introduction	9
1.2. Linear bounded operators defined on spaces of continuous vector-valued functions and acting into \mathbb{R}^m or \mathbb{C}^m	10
1.3. Linear bounded operators defined on Lebesgue spaces of vector-valued functions and acting into \mathbb{R}^m or \mathbb{C}^m	17
1.4. Comments to Chapter 1	20
Chapter 2. Maximum Modulus Principle for Second Order Strongly Elliptic Systems	21
2.1. Introduction	21
2.2. Systems with constant coefficients without lower order terms	23
2.3. General second order strongly elliptic systems	33
2.4. Comments to Chapter 2	52
Chapter 3. Sharp Constants in the Miranda-Agmon Inequalities for Solutions of Certain Systems of Mathematical Physics	55
3.1. Introduction	55
3.2. Best constants in the Miranda-Agmon inequalities for solutions of strongly elliptic systems in a half-space	58
3.3. The Lamé and Stokes systems in a half-space	64
3.4. Planar deformed state	69
3.5. The system of quasistatic viscoelasticity	71
3.6. Comments to Chapter 3	75
Chapter 4. Sharp Pointwise Estimates for Solutions of Elliptic Systems with Boundary Data from L^p	77
4.1. Introduction	77
4.2. Best constants in pointwise estimates for solutions of strongly elliptic systems with boundary data from L^p	79
4.3. The Stokes system in a half-space	83
4.4. The Stokes system in a ball	85
4.5. The Lamé system in a half-space	87
4.6. The Lamé system in a ball	91
4.7. Comments to Chapter 4	92

Chapter 5.	Sharp Constant in the Miranda-Agmon Type Inequality for Derivatives of Solutions to Higher Order Elliptic Equations	93
5.1.	Introduction	93
5.2.	Weak form of the Miranda-Agmon inequality with the sharp constant	94
5.3.	Sharp constants for biharmonic functions	98
5.4.	Comments to Chapter 5	104
Chapter 6.	Sharp Pointwise Estimates for Directional Derivatives and Khavinson's Type Extremal Problems for Harmonic Functions	105
6.1.	Introduction	105
6.2.	Khavinson's type extremal problem for bounded or semibounded harmonic functions in a ball and a half-space	110
6.3.	Sharp estimates for directional derivatives and Khavinson's type extremal problem in a half-space with boundary data from L^p	117
6.4.	Sharp estimates for directional derivatives and Khavinson's type extremal problem in a ball with boundary data from L^p	131
6.5.	Sharp estimates for the gradient of a solution of the Neumann problem in a half-space	145
6.6.	Comments to Chapter 6	148
Chapter 7.	The Norm and the Essential Norm for Double Layer Vector-Valued Potentials	151
7.1.	Introduction	151
7.2.	Definition and certain properties of a solid angle	154
7.3.	Matrix-valued integral operators of the double layer potential type	161
7.4.	Boundary integral operators of elasticity and hydrodynamics	173
7.5.	Comments to Chapter 7	197
Part 2.	Parabolic Systems	201
Chapter 8.	Maximum Modulus Principle for Parabolic Systems	203
8.1.	Introduction	203
8.2.	The Cauchy problem for systems of order 2ℓ	205
8.3.	Second order systems	217
8.4.	The parabolic Lamé system	230
8.5.	Comments to Chapter 8	235
Chapter 9.	Maximum Modulus Principle for Parabolic Systems with Zero Boundary Data	237
9.1.	Introduction	237
9.2.	The case of real coefficients	238
9.3.	The case of complex coefficients	246
9.4.	Comments to Chapter 9	249
Chapter 10.	Maximum Norm Principle for Parabolic Systems without Lower Order Terms	251
10.1.	Introduction	251
10.2.	Some notation	255

10.3.	Representation of the constant $\mathcal{K}(\mathbb{R}^n, T)$	256
10.4.	Necessary condition for validity of the maximum norm principle for the system $\partial\mathbf{u}/\partial t - \mathfrak{A}_0(x, t, D_x)\mathbf{u} = \mathbf{0}$	259
10.5.	Sufficient condition for validity of the maximum norm principle for the system $\partial\mathbf{u}/\partial t - \mathfrak{A}_0(x, t, D_x)\mathbf{u} = \mathbf{0}$	262
10.6.	Necessary and sufficient condition for validity of the maximum norm principle for the system $\partial\mathbf{u}/\partial t - \mathfrak{A}_0(x, D_x)\mathbf{u} = \mathbf{0}$	264
10.7.	Certain particular cases and examples	269
10.8.	Comments to Chapter 10	275
Chapter 11.	Maximum Norm Principle with Respect to Smooth Norms for Parabolic Systems	277
11.1.	Introduction	277
11.2.	Representation for the constant $\mathcal{K}(\mathbb{R}^n, T)$	280
11.3.	Necessary condition for validity of the maximum norm principle for the system $\partial\mathbf{u}/\partial t - \mathfrak{A}(x, t, D_x)\mathbf{u} = \mathbf{0}$	284
11.4.	Sufficient condition for validity of the maximum norm principle for the system $\partial\mathbf{u}/\partial t - \mathfrak{A}(x, t, D_x)\mathbf{u} = \mathbf{0}$ with scalar principal part	288
11.5.	Criteria for validity of the maximum norm principle for the system $\partial\mathbf{u}/\partial t - \mathfrak{A}(x, D_x)\mathbf{u} = \mathbf{0}$. Certain particular cases	291
11.6.	Example: criterion for validity of the maximum p -norm principle, $2 < p < \infty$	294
11.7.	Comments to Chapter 11	296
	Bibliography	297
	List of Symbols	307
	Index	313
