|---|----------|
| Preface | xi |
| Introduction | xiii |
| Part 1. Hardy Type Inequalities | 1 |
| Chapter 1. Bessel Pairs and Sturm's Oscillation Theory | 3 |
| 1.1. The class of Hardy improving potentials | 3 |
| 1.2. Sturm theory and integral criteria for HI-potentials | 9 |
| 1.3. The class of Bessel pairs | 14 |
| 1.4. Further comments | 17 |
| Chapter 2. The Classical Hardy Inequality and Its Improvements | 19 |
| 2.1. One dimensional Poincaré inequalities | 19 |
| 2.2. HI-potentials and improved Hardy inequalities on balls | 21 |
| 2.3. Improved Hardy inequalities on domains with 0 in their interior | 24 |
| 2.4. Attainability of the best Hardy constant on domains with 0 in their interior | 26 |
| 2.5. Further comments | 28 |
| Chapter 3. Improved Hardy Inequality with Boundary Singularity | 31 |
| 3.1. Improved Hardy inequalities on conical domains with vertex at 0 | 31 |
| 3.2. Attainability of the Hardy constants on domains having 0 on the boundary | 34 |
| 3.3. Best Hardy constant for domains contained in a half-space | 38 |
| 3.4. The Poisson equation on the punctured disc | 41 |
| 3.5. Further comments | 42 |
| Chapter 4. Weighted Hardy Inequalities | 45 |
| 4.1. Bessel pairs and weighted Hardy inequalities | 45 |
| 4.2. Improved weighted Hardy-type inequalities on bounded domains | 49 |
| 4.3. Weighted Hardy-type inequalities on \mathbb{R}^n | 52 |
| 4.4. Hardy inequalities for functions in $H^1(\Omega)$ | 54 |
| 4.5. Further comments | 57 |
| Chapter 5. The Hardy Inequality and Second Order Nonlinear Eigenvalue Problems | 59 |
| 5.1. Second order nonlinear eigenvalue problems | 59 |
| 5.2. The role of dimensions in the regularity of extremal solutions | 61 |
| 5.3. Asymptotic behavior of stable solutions near the extremals | 62 |
| 5.4. The bifurcation diagram for small parameters | 65 |

| | |
|--|------------|
| 5.5. Further comments | 67 |
| Part 2. Hardy-Rellich Type Inequalities | 69 |
| Chapter 6. Improved Hardy-Rellich Inequalities on $H_0^2(\Omega)$ | 71 |
| 6.1. General Hardy-Rellich inequalities for radial functions | 71 |
| 6.2. General Hardy-Rellich inequalities for non-radial functions | 74 |
| 6.3. Optimal Hardy-Rellich inequalities with power weights $ x ^m$ | 78 |
| 6.4. Higher order Rellich inequalities | 83 |
| 6.5. Calculations of best constants | 85 |
| 6.6. Further comments | 90 |
| Chapter 7. Weighted Hardy-Rellich Inequalities on $H^2(\Omega) \cap H_0^1(\Omega)$ | 93 |
| 7.1. Inequalities between Hessian and Dirichlet energies on $H^2(\Omega) \cap H_0^1(\Omega)$ | 93 |
| 7.2. Hardy-Rellich inequalities on $H^2(\Omega) \cap H_0^1(\Omega)$ | 101 |
| 7.3. Further comments | 107 |
| Chapter 8. Critical Dimensions for 4 th Order Nonlinear Eigenvalue Problems | 109 |
| 8.1. Fourth order nonlinear eigenvalue problems | 109 |
| 8.2. A Dirichlet boundary value problem with an exponential nonlinearity | 110 |
| 8.3. A Dirichlet boundary value problem with a MEMS nonlinearity | 113 |
| 8.4. A Navier boundary value problem with a MEMS nonlinearity | 118 |
| 8.5. Further comments | 121 |
| Part 3. Hardy Inequalities for General Elliptic Operators | 123 |
| Chapter 9. General Hardy Inequalities | 125 |
| 9.1. A general inequality involving interior and boundary weights | 125 |
| 9.2. Best pair of constants and eigenvalue estimates | 132 |
| 9.3. Weighted Hardy inequalities for general elliptic operators | 134 |
| 9.4. Non-quadratic general Hardy inequalities for elliptic operators | 137 |
| 9.5. Further comments | 141 |
| Chapter 10. Improved Hardy Inequalities For General Elliptic Operators | 143 |
| 10.1. General Hardy inequalities with improvements | 143 |
| 10.2. Characterization of improving potentials via ODE methods | 147 |
| 10.3. Hardy inequalities on $H^1(\Omega)$ | 151 |
| 10.4. Hardy inequalities for exterior and annular domains | 154 |
| 10.5. Further comments | 156 |
| Chapter 11. Regularity and Stability of Solutions in Non-Self-Adjoint Problems | 157 |
| 11.1. Variational formulation of stability for non-self-adjoint eigenvalue problems | 157 |
| 11.2. Regularity of semi-stable solutions in non-self-adjoint boundary value problems | 159 |
| 11.3. Liouville type theorems for general equations in divergence form | 161 |
| 11.4. Further remarks | 167 |
| Part 4. Mass Transport and Optimal Geometric Inequalities | 169 |

| | |
|---|------------|
| Chapter 12. A General Comparison Principle for Interacting Gases | 171 |
| 12.1. Mass transport with quadratic cost | 171 |
| 12.2. A comparison principle between configurations of interacting gases | 173 |
| 12.3. Further comments | 179 |
| Chapter 13. Optimal Euclidean Sobolev Inequalities | 181 |
| 13.1. A general Sobolev inequality | 181 |
| 13.2. Sobolev and Gagliardo-Nirenberg inequalities | 182 |
| 13.3. Euclidean Log-Sobolev inequalities | 183 |
| 13.4. A remarkable duality | 185 |
| 13.5. Further remarks and comments | 189 |
| Chapter 14. Geometric Inequalities | 191 |
| 14.1. Quadratic case of the comparison principle and the HWBI inequality | 191 |
| 14.2. Gaussian inequalities | 193 |
| 14.3. Trends to equilibrium in Fokker-Planck equations | 196 |
| 14.4. Further comments | 197 |
| Part 5. Hardy-Rellich-Sobolev Inequalities | 199 |
| Chapter 15. The Hardy-Sobolev Inequalities | 201 |
| 15.1. Interpolating between Hardy's and Sobolev inequalities | 201 |
| 15.2. Best constants and extremals when 0 is in the interior of the domain | 203 |
| 15.3. Symmetry of the extremals on half-space | 206 |
| 15.4. The Sobolev-Hardy-Rellich inequalities | 208 |
| 15.5. Further comments and remarks | 211 |
| Chapter 16. Domain Curvature and Best Constants in the Hardy-Sobolev Inequalities | 213 |
| 16.1. From the subcritical to the critical case in the Hardy-Sobolev inequalities | 213 |
| 16.2. Preliminary blow-up analysis | 219 |
| 16.3. Refined blow-up analysis and strong pointwise estimates | 227 |
| 16.4. Pohozaev identity and proof of attainability | 236 |
| 16.5. Appendix: Regularity of weak solutions | 240 |
| 16.6. Further comments | 243 |
| Part 6. Aubin-Moser-Onofri Inequalities | 245 |
| Chapter 17. Log-Sobolev Inequalities on the Real Line | 247 |
| 17.1. One-dimensional version of the Moser-Aubin inequality | 247 |
| 17.2. The Euler-Lagrange equation and the case $\alpha \geq \frac{2}{3}$ | 250 |
| 17.3. The optimal bound in the one-dimensional Aubin-Moser-Onofri inequality | 252 |
| 17.4. Ghigi's inequality for convex bounded functions on the line | 258 |
| 17.5. Further comments | 262 |
| Chapter 18. Trudinger-Moser-Onofri Inequality on \mathbb{S}^2 | 263 |
| 18.1. The Trudinger-Moser inequality on \mathbb{S}^2 | 263 |
| 18.2. The optimal Moser-Onofri inequality | 267 |

| | | |
|-------------|--|-----|
| 18.3. | Conformal invariance of J_1 and its applications | 270 |
| 18.4. | Further comments | 272 |
| Chapter 19. | Optimal Aubin-Moser-Onofri Inequality on \mathbb{S}^2 | 275 |
| 19.1. | The Aubin inequality | 275 |
| 19.2. | Towards an optimal Aubin-Moser-Onofri inequality on \mathbb{S}^2 | 277 |
| 19.3. | Bol's isoperimetric inequality | 283 |
| 19.4. | Further comments | 287 |
| | Bibliography | 289 |
