

Index

- $(\chi_n)_{n \geq 0}$, Haar basis 29
- $(\phi_n)_{n \geq 0}$, Schauder functions on $[0, 1]$ 29
- action functional, 9
- albedo, 2
- Brownian motion, 28
- $C([0, T], \mathbb{R}^d)$, \mathbb{R}^d -valued continuous functions on $[0, T]$, 49
- $C_0^\infty(\mathbb{R}, \mathbb{R})$, infinitely differentiable real valued functions on \mathbb{R} vanishing at $\pm\infty$ 92
- $C_c^\infty(G, \mathbb{R})$, real valued infinitely smooth functions of compact support contained in an open set $G \subset \mathbb{R}$, 70
- $C^k(\mathbb{R}, \mathbb{R})$, real valued functions on \mathbb{R} with continuous k -th derivative 92
- $C_0([0, T], \mathbb{R}^d)$, \mathbb{R}^d -valued continuous functions on $[0, T]$ starting at 0, 51
- $C^\alpha([0, 1], \mathbb{R})$, space of α -Hölder continuous real valued functions on $[0, 1]$ starting at 0 28
- $\mathcal{C}_0^\alpha([0, 1], \mathbb{R})$, separable subspace of real valued α -Hölder continuous functions on $[0, 1]$ starting at 0, 32
- Ciesielski isomorphism, 28
- $c_0(\mathbb{N}_0, \mathbb{R})$, space of real valued sequences converging to 0, 32
- contraction principle, 40
 - inverse, 41
- dissipativity condition, 53
- entropy, 87
- exponential tightness, 38
- $\mathcal{H}_1([0, T], \mathbb{R})$, \mathcal{H}_1 , Cameron–Martin space of real valued functions on $[0, T]$, 46
- $\mathcal{H}_1([0, T], \mathbb{R}^d)$, \mathcal{H}_1 , Cameron–Martin space of \mathbb{R}^d -valued functions on $[0, T]$, 50
- condition **(H)**, 139
- hysteresis loop, 22
- interval of resonance, 20
- $L(\mathbb{R}, \mathbb{R}; \rho dx)$, real valued functions on \mathbb{R} which are square integrable with weight ρ 93
- $L^2([0, T], \mathbb{R}^d)$, Lebesgue measurable \mathbb{R}^d -valued square integrable functions on $[0, T]$ 29
- $l^\infty(\mathbb{N}_0, \mathbb{R})$, space of bounded sequences of real numbers 28
- large deviation principle, 37
 - weak, 38
- LDP, *see also* large deviation principle
- $\|\cdot\|_\alpha$, α -Hölder norm 28
- $\|\cdot\|_\infty, \|\cdot\|$, uniform norm 28
- Ornstein–Uhlenbeck process, 8
- quasipotential, 9
- relative entropy, 86
- resonant activation, 22
- rate function, 37
 - good, 37
- Schilder’s theorem, 50
- Schmitt trigger, 22
- spectral gap, 111
- spectral power amplification coefficient, 13,
 - modified 129
- stochastic resonance, 1
