Preface	ix
Introduction	1
References	8
Notation and terminology	9
Chapter 1. Algebraic theory of complex multiplication	13
1.1. Introduction	13
1.2. Simplicity, isotypicity, and endomorphism algebras	15
1.3. Complex multiplication	23
1.4. Dieudonné theory, p -divisible groups, and deformations	33
1.5. CM types	65
1.6. Abelian varieties over finite fields	70
1.7. A theorem of Grothendieck and a construction of Serre	76
1.8. CM lifting questions	86
Chapter 2. CM lifting over a discrete valuation ring	91
2.1. Introduction	91
2.2. Existence of CM lifting up to isogeny	102
2.3. CM lifting to a normal domain up to isogeny: counterexamples	109
2.4. Algebraic Hecke characters	117
2.5. Theory of complex multiplication	127
2.6. Local methods	130
Chapter 3. CM lifting of p -divisible groups	137
3.1. Motivation and background	137
3.2. Properties of a -numbers	143
3.3. Isogenies and duality	146
3.4. Some p -divisible groups with small a -number	156
3.5. Earlier non-liftability results and a new proof	161
3.6. A lower bound on the field of definition	164
3.7. Complex multiplication for p -divisible groups	166
3.8. An upper bound for a field of definition	182
3.9. Appendix: algebraic abelian p -adic representations of local fields	185
3.10. Appendix: questions and examples on extending isogenies	191
Chapter 4. CM lifting of abelian varieties up to isogeny	195
4.1. Introduction	195
4.2. Classification and Galois descent by Lie types	211

4.3. Tensor construction for p -divisible groups	224
4.4. Self-duality and CM lifting	228
4.5. Striped and supersingular Lie types	233
4.6. Complex conjugation and CM lifting	240
Appendix A. Some arithmetic results for abelian varieties	249
A.1. The p -part of Tate's work	249
A.2. The Main Theorem of Complex Multiplication	257
A.3. A converse to the Main Theorem of Complex Multiplication	292
A.4. Existence of algebraic Hecke characters	296
Appendix B. CM lifting via p -adic Hodge theory	321
B.1. A generalization of the toy model	321
B.2. Construct CM lifting by p -adic Hodge theory	333
B.3. Dieudonné theories over a perfect field of characteristic p	343
B.4. p -adic Hodge theory and a formula for the closed fiber	359
Notes on Quotes	371
Glossary of Notations	373
Bibliography	379
Index	385
