- Straightening relation, 116
- Subcomplex of simplicial complex, 59
- Sullivan algebra (of piecewise polynomial differential forms), 424
- Supporting hyperplane, 1
- Suspension
 - of module, 396
 - of simplicial complex, 61
 - of space, 417
- Suspension isomorphism, 421
- Symplectic manifold, 195
- Symplectic reduction, 196, 209, 237
- Symplectic quotient, 196, 209
- Syzygy, 399
- Tangent bundle along the fibres, 250, 431
- Tangential representation, 430
- Tautological line bundle, 430
 - over projectivisation, 463
- Tensor product (of modules), 396
- T -graph (torus graph), 304
- Thom class, 267, 305, 432
- Thom isomorphism, 467
- Thom space, 454
- T -manifold, 239
- Todd genus (td), 378, 483
- Topological fan, 280
 - complete, 280
- Topological monoid, 442
- Topological toric manifold, 278
- Tor (functor), 401
- Tor-algebra, 97
- Toral rank, 162
- Toric manifold, 185, 237, 242
 - Hamiltonian, 199, 212
 - over cube, 288
 - projective, 185
- Toric space, xi, 130
- Toric variety, 24, 179
 - affine, 180
 - projective, 183
 - real, 234, 283
- Torus
 - algebraic, 179
 - standard, 130
- Torus manifold, 257
- Triangulated manifold, 76
- Triangulated sphere, 21, 69
 - flag, 74
- Triangulation, 55, 61
 - neighbourly, 75, 141
- Tropical geometry, 283
- Truncated cube, 40
- Truncated simplex, 38
- Truncation, 5
- Type (of S^1 -action), 389
- Undercategory, 440
- Underlying simplicial complex (of fan), 61
- Unipotent (upper triangular matrix), 291
- Universal G -space (universal bundle), 429
- Universal toric genus, 357, 360
- Upper Bound Theorem (UBT), 20
- Vector bundle, 429
- Vertex
 - of polytope, 2
 - of simplicial complex, 59
 - of simplicial poset, 81
- Vertex truncation (vt), 5
- Volume polynomial, 24

- Weak equivalence
 - of dg-algebras, 410
 - in model category, 440
- Wedge (of spaces), 138, 413
 - of spheres, 171, 321, 345
- Weierstrass \wp -function, 387, 487
- Weierstrass σ -function, 487, 488
- Weight (of torus representation), 250, 377, 434
- Weight graph, 302
- Weight lattice (of torus), 210, 434
- Weyl group, 380
