

Index

- $D(x)$, divisor counting function, 29
 L operator, 16
 T operator, 16
 $\Pi_c(x)$, continuous prime counting function, 5
 \mathcal{V} function class, 9
 $\mathcal{V}(c)$, $d\mathcal{V}(c)$, 21
 $\text{li}(x)$, 139
 ω function, 233
 $\phi_c(x, y)$, 233
 $\psi_c(x, y)$, 230
 ρ function, 230
 σ -norm, 11
 $d\mathcal{V}$ measure class, 10
- absolutely convergent, 11
Apostol, T. M., xi
asscissa of convergence, 10
Axer's Theorem, 63, 154
- Bateman, P. T., v, xi, 161
Bernoulli variables, 196
Bernstein inequality, 196
Beurling, A., xi, 1, 40
Bochner PNT proof, 110
Borel measure, 9
Buchstab identity for $\psi_c(x, y)$, 237
Buchstab omega function, 233
- Chandrasekharan, K., xi
Chebyshev bounds, 19, 53, 83, 111
Chebyshev identity, 19, 27
Chebyshev identity for $\phi_c(x, y)$, 237
Cohen, P. J., xi
continuous function example, 5
continuous prime number theory, 2
convergence of measures, 11
convolution of functions, 15
convolution of measures, 12
counting function of g -integers, 3
counting functions of g -primes, 2
cumulative distribution function, 10
- Davenport, H., xi
de Bruijn, N. G., 230
de la Vallée Poussin, Ch. J., 1, 195
density, 3, 63
derivation, 17
Diamond, H. G., xi, 111, 161
Dickman rho function, 230
distribution function, 10
divisor function, 29
dVDP type remainder term, 175
- equivalent, 151, 160
Euler product representation, 3
exponential representation, 19
- Fejér kernel, 101
Friedlander, J., 235
function class \mathcal{V} , 9
- g - (generalized), 1
 g -number counting functions, 2, 3
 g -number system, 6
 g -prime system, 2
 g -zeta function, 3
generalized Dirichlet series, 3
- Hall, R. S., 95, 193
Hardy-Littlewood-Karamata Theorem, 43
Hilberdink, T., 6
Hildebrand identity for $\psi_c(x, y)$, 237
Hildebrand, A. J., xi
- indicator function of a set, 12
Ingham, A. E., xi
invertible, 22
- Kahane, J.-P., xi, 111
Kolmogorov inequality, 196
- Landau, E., xi, 195
logarithmic density, 30, 41, 53
logarithmic integral, 5
lower density, 53
lower logarithmic density, 30
lower-residue, 34
- measure, 9
Mellin integral, 10

- Mellin transform, 3, 10
- Mertens' product formula, 46
- Mertens' sum formula, 45
- Montgomery, H. L., xi
- multiplicative convolution of measures, 12

- norm, 11
- Nyman type remainder term, 175
- Nyman, B., 192

- O-density, 3, 53
- O-log density, 30
- odd number example, 4
- optimality of a Chebyshev bound, 119
- optimality of PNT error term, 195
- outer g-number system, 6

- Plancherel's identity, 138, 162
- PNT (prime number theorem), 1
- Poisson summation formula, 169
- polynomial growth, 9

- random g-primes, 196
- regular growth, 39, 79
- remainder term in PNT, 175
- repeated prime example, 4
- Riemann hypothesis, 1, 195
- Riemann Hypothesis example, 205
- Riemann-Lebesgue lemma, 107
- right continuous, 9
- right hand residue, 41, 63

- Saias, E., 235
- Schlage-Puchta, J. C., 148
- Schwartz function, 166
- sharp Mertens relation, 151
- smooth numbers, 229

- Tauber's Theorem, 49
- template distribution, 196
- Tenenbaum, G., xi
- thin set of primes, 37
- total variation function, 9
- Tschakaloff, L., 193

- unboundedness of $\pi(x)$, 77
- upper density, 53
- upper logarithmic density, 30
- upper-residue, 30

- Vaughan, R. C., xi
- Vindas, J., 111, 117, 148

- Weber, 195
- Wegmann, H., 192
- Wiener-Ikehara Theorem, 100
- Wiener-Ikehara upper, lower bounds, 100
- wobbly g-prime function, 139

- Zhang, W.-B., 111, 117
