Preface	ix
Acknowledgements	xxvii
Introduction	xxix
<b>Part I. Inf-schemes</b>	<b>1</b>
Introduction	3
1. Why inf-schemes?	3
2. Deformation theory	4
3. Inf-schemes	5
4. Ind-coherent sheaves on inf-schemes	7
5. Crystals and D-modules	8
Chapter 1. Deformation theory	11
Introduction	11
1. Push-outs of schemes	18
2. (pro)-cotangent and tangent spaces	23
3. Properties of (pro)-cotangent spaces	30
4. The (pro)-cotangent complex	36
5. Digression: square-zero extensions	43
6. Infinitesimal cohesiveness	51
7. Deformation theory	54
8. Consequences of admitting deformation theory	60
9. A criterion for being locally almost of finite type	64
10. Square-zero extensions of prestacks	70
Chapter 2. Ind-schemes and inf-schemes	77
Introduction	77
1. Ind-schemes	81
2. Proofs of results concerning ind-schemes	91
3. (Ind)-inf-schemes	103
4. (Ind)-inf-schemes and nil-closed embeddings	106
Chapter 3. Ind-coherent sheaves on ind-inf-schemes	117
Introduction	117
1. Ind-coherent sheaves on ind-schemes	122
2. Proper base change for ind-schemes	129
3. IndCoh on (ind)-inf-schemes	133
4. The direct image functor for ind-inf-schemes	139

5. Extending the formalism of correspondences to inf-schemes	146
6. Self-duality and multiplicative structure of IndCoh on ind-inf-schemes	154
Chapter 4. An application: crystals	159
Introduction	159
1. Crystals on prestacks and inf-schemes	164
2. Crystals as a functor out of the category of correspondences	170
3. Inducing crystals	174
4. Comparison with the classical theory of D-modules	178
<b>Part II. Formal geometry</b>	<b>191</b>
Introduction	193
1. What is formal geometry?	193
2. Lie algebras	195
3. Formal groups vs. Lie algebras	196
4. Lie algebroids	198
5. Infinitesimal differential geometry	199
6. A simplifying remark	201
Chapter 5. Formal moduli	203
Introduction	203
1. Formal moduli problems	206
2. Groupoids	213
Chapter 6. Lie algebras and co-commutative co-algebras	223
Introduction	223
1. Algebras over operads	226
2. Koszul duality	239
3. Associative algebras	249
4. Lie algebras and co-commutative co-algebras	253
5. The universal enveloping algebra	260
6. The universal envelope via loops	264
7. Modules	267
A. Proof of Theorem 2.9.4	276
B. Proof of the PBW theorem	280
C. Commutative co-algebras and bialgebras	282
Chapter 7. Formal groups and Lie algebras	285
Introduction	285
1. Formal moduli problems and co-algebras	290
2. Inf-affineness	299
3. From formal groups to Lie algebras	303
4. Proof of Theorem 3.1.4	314
5. Modules over formal groups and Lie algebras	318
6. Actions of formal groups on prestacks	322
Chapter 8. Lie algebroids	327
Introduction	327
1. The inertia group	331

2. Lie algebroids: definition and basic pieces of structure	334
3. Examples of Lie algebroids	338
4. Modules over Lie algebroids and the universal enveloping algebra	342
5. Square-zero extensions and Lie algebroids	345
6. IndCoh of a square-zero extension	354
7. Global sections of a Lie algebroid	360
8. Lie algebroids as modules over a monad	364
9. Relation to classical Lie algebroids	370
A. An application: ind-coherent sheaves on push-outs	376
Chapter 9. Infinitesimal differential geometry	381
Introduction	381
1. Filtrations and the monoid $\mathbb{A}^1$	387
2. Deformation to the normal bundle	393
3. The canonical filtration on a Lie algebroid	400
4. The case of groups	404
5. Infinitesimal neighborhoods	407
6. Filtration on the universal enveloping algebra of a Lie algebroid	414
7. The case of a regular embedding	418
A. Weil restriction of scalars	425
Bibliography	429
Index of Notations	431
Index	435
