Preface	xi
Chapter 1. Idempotents and traces	1
1.1. Primitive idempotents for the symmetric group	1
1.2. Primitive idempotents for the Brauer algebra	6
1.3. Traces on the Brauer algebra	14
1.4. Tensor notation	17
1.5. Action of the symmetric group and the Brauer algebra	19
1.6. Bibliographical notes	21
Chapter 2. Invariants of symmetric algebras	23
2.1. Invariants in type A	23
2.2. Invariants in types B, C and D	28
2.3. Symmetrizer and extremal projector	39
2.4. Bibliographical notes	41
Chapter 3. Manin matrices	43
3.1. Definition and basic properties	43
3.2. Identities and invertibility	45
3.3. Bibliographical notes	51
Chapter 4. Casimir elements for \mathfrak{gl}_N	53
4.1. Matrix presentations of simple Lie algebras	53
4.2. Harish-Chandra isomorphism	55
4.3. Factorial Schur polynomials	58
4.4. Schur–Weyl duality	60
4.5. A general construction of central elements	61
4.6. Capelli determinant	63
4.7. Permanent-type elements	65
4.8. Gelfand invariants	66
4.9. Quantum immanants	67
4.10. Bibliographical notes	69
Chapter 5. Casimir elements for \mathfrak{o}_N and \mathfrak{sp}_N	71
5.1. Harish-Chandra isomorphism	71
5.2. Brauer–Schur–Weyl duality	74
5.3. A general construction of central elements	76
5.4. Symmetrizer and anti-symmetrizer for \mathfrak{o}_N	78
5.5. Symmetrizer and anti-symmetrizer for \mathfrak{sp}_N	83
5.6. Manin matrices in types B, C and D	89
5.7. Bibliographical notes	90

Chapter 6. Feigin–Frenkel center	91
6.1. Center of a vertex algebra	91
6.2. Affine vertex algebras	93
6.3. Feigin–Frenkel theorem	96
6.4. Affine symmetric functions	101
6.5. From Segal–Sugawara vectors to Casimir elements	103
6.6. Center of the completed universal enveloping algebra	104
6.7. Bibliographical notes	106
Chapter 7. Generators in type A	107
7.1. Segal–Sugawara vectors	107
7.2. Sugawara operators in type A	114
7.3. Bibliographical notes	117
Chapter 8. Generators in types B , C and D	119
8.1. Segal–Sugawara vectors in types B and D	119
8.2. Low degree invariants in trace form	128
8.3. Segal–Sugawara vectors in type C	134
8.4. Low degree invariants in trace form	142
8.5. Sugawara operators in types B , C and D	145
8.6. Bibliographical notes	147
Chapter 9. Commutative subalgebras of $U(\mathfrak{g})$	149
9.1. Mishchenko–Fomenko subalgebras	149
9.2. Vinberg’s quantization problem	155
9.3. Generators of commutative subalgebras of $U(\mathfrak{gl}_N)$	157
9.4. Generators of commutative subalgebras of $U(\mathfrak{o}_N)$ and $U(\mathfrak{sp}_N)$	165
9.5. Bibliographical notes	167
Chapter 10. Yangian characters in type A	169
10.1. Yangian for \mathfrak{gl}_N	169
10.2. Dual Yangian for \mathfrak{gl}_N	177
10.3. Double Yangian for \mathfrak{gl}_N	180
10.4. Invariants of the vacuum module over the double Yangian	183
10.5. From Yangian invariants to Segal–Sugawara vectors	185
10.6. Screening operators	186
10.7. Bibliographical notes	190
Chapter 11. Yangian characters in types B , C and D	191
11.1. Yangian for \mathfrak{g}_N	191
11.2. Dual Yangian for \mathfrak{g}_N	202
11.3. Screening operators	206
11.4. Bibliographical notes	211
Chapter 12. Classical \mathcal{W} -algebras	213
12.1. Poisson vertex algebras	213
12.2. Generators of $\mathcal{W}(\mathfrak{g})$	216
12.3. Chevalley projection	226
12.4. Screening operators	228
12.5. Bibliographical notes	241

Chapter 13. Affine Harish-Chandra isomorphism	243
13.1. Feigin–Frenkel centers and classical \mathcal{W} -algebras	243
13.2. Yangian characters and classical \mathcal{W} -algebras	255
13.3. Harish-Chandra images of Sugawara operators	259
13.4. Harish-Chandra images of Casimir elements	263
13.5. Bibliographical notes	268
Chapter 14. Higher Hamiltonians in the Gaudin model	269
14.1. Bethe ansatz equations	269
14.2. Gaudin Hamiltonians and eigenvalues	271
14.3. Bibliographical notes	275
Chapter 15. Wakimoto modules	277
15.1. Free field realization of \mathfrak{gl}_N	277
15.2. Free field realization of \mathfrak{o}_N	280
15.3. Free field realization of \mathfrak{sp}_{2n}	284
15.4. Wakimoto modules in type A	287
15.5. Wakimoto modules in types B and D	289
15.6. Wakimoto modules in type C	292
15.7. Bibliographical notes	294
Bibliography	295
Index	303
