Introduction	
BY JOHN W. MORGAN	ix
Notes on Kuranishi Atlases	
BY DUSA MCDUFF	1
1. Introduction	1
1.1. Outline of the main ideas	4
2. Kuranishi atlases with trivial isotropy	8
2.1. Smooth Kuranishi charts, coordinate changes and atlases	8
2.2. The Kuranishi category and virtual neighbourhood $ \mathcal{K} $	13
2.3. Tame topological atlases	20
2.4. Reductions and the construction of perturbation sections	33
3. Kuranishi atlases with nontrivial isotropy	44
3.1. Kuranishi atlases	45
3.2. Categories and tamings	54
3.3. Orientations	57
3.4. Perturbation sections and construction of the VFC	63
4. Constructing atlases	72
4.1. Sketch proof of Theorem A	72
4.2. Manipulating atlases	80
5. Atlases for orbifolds and orbibundles	82
5.1. Orbifolds	82
5.2. Nontrivial obstruction bundles	88
6. Order structures and products	93
6.1. Semi-additive atlases	93
6.2. From a good semi-additive atlas to the VFC	97
6.3. From semi-additive to tameable atlases	101
References	107
Gromov-Witten Theory via Kuranishi Structures	
BY MOHAMMAD F. TEHRANI AND KENJI FUKAYA	111
Preface	111
1. Introduction	113
1.1. Moduli space of pseudoholomorphic maps	114
1.2. GW invariants	117
1.3. Semi-positive case	117
1.4. Virtual Fundamental Class	118
1.5. Outline	121

2.	Preliminaries	122
2.1.	Orbifolds	123
2.2.	Orbibundles	127
2.3.	Multisections	130
2.4.	Perturbations	133
2.5.	Resolution of multisections	136
2.6.	Euler class	145
3.	Abstract Kuranishi structures	151
3.1.	Introductory remarks	151
3.2.	Kuranishi structures	152
3.3.	Dimensionally graded systems	156
3.4.	Shrinking	162
3.5.	Cobordism	166
3.6.	Existence of DGS (proof of Theorem 3.5.3)	168
3.7.	Deformations of Kuranishi maps	181
3.8.	Construction of perfect EOB (proof of Theorem 3.7.11)	188
3.9.	Kuranishi vector bundles	192
4.	VFC for abstract Kuranishi spaces	193
4.1.	The construction of a VFC in a thickening	193
4.2.	VFC via evaluation maps	200
4.3.	Čech homology VFC	201
5.	Moduli spaces of stable maps	202
5.1.	Stable curves and stable maps	203
5.2.	Orbifold structure of the Deligne-Mumford space	206
5.3.	Gromov Topology	211
6.	Kuranishi structure over moduli space of stable maps	214
6.1.	Analytics preliminaries	215
6.2.	Case of smooth stable domain	219
6.3.	Case of stable nodal domain	225
6.4.	Case of un-stable domain	233
6.5.	Induced charts	236
6.6.	Coordinate change maps	243
6.7.	GW invariants	246
7.	Examples	247
7.1.	Degree zero maps	247
7.2.	Elliptic surfaces	248
7.3.	Genus zero maps in quintic	249
	References	250

Kuranishi Spaces as a 2-category

BY DOMINIC JOYCE

		253
1.	Introduction	253
2.	Previous definitions of Kuranishi space	255
2.1.	Fukaya–Oh–Ohta–Ono’s Kuranishi spaces	255
2.2.	How FOOO Kuranishi spaces are used	258
2.3.	McDuff–Wehrheim’s Kuranishi atlases	259
2.4.	How MW Kuranishi atlases are used	261

2.5. Dingyu Yang's Kuranishi structures, and Hofer–Wysocki–Zehnder's polyfolds	261
2.6. How polyfolds are used	263
3. Kuranishi neighbourhoods as a 2-category	264
3.1. Kuranishi neighbourhoods, 1-morphisms, and 2-morphisms	264
3.2. Making Kuranishi neighbourhoods into a 2-category	267
3.3. Properties of 1- and 2-morphisms	272
3.4. Relation to Fukaya–Oh–Ohta–Ono's work	273
3.5. Relation to McDuff and Wehrheim's work	274
3.6. Relation to d-orbifolds	275
4. The weak 2-category of Kuranishi spaces	276
4.1. Kuranishi spaces, 1-morphisms, and 2-morphisms	276
4.2. Making Kuranishi spaces into a 2-category	279
4.3. Manifolds, orbifolds, and m-Kuranishi spaces	281
4.4. Relation to FOOO, MW, DY, polyfolds, and d-orbifolds	284
5. Differential geometry of Kuranishi spaces	285
5.1. Isotropy groups, and tangent and obstruction spaces	285
5.2. W-transverse morphisms and fibre products	288
5.3. Submersions and w-submersions	289
Appendix A. Background from Category Theory and Algebraic Geometry	289
A.1. Basics of 2-categories	289
A.2. 2-functors between 2-categories	292
A.3. Fibre products in 2-categories	293
A.4. Sheaves and stacks on topological spaces	294
References	295
