Preface	xi
Introduction	1
Chapter 1. Nonassociative Algebras	5
1.1. Definitions and notation	5
1.2. Multiplication algebra and centroid	10
1.3. Extended centroid and central closure	11
1.4. Nilpotency and local nilpotency	14
1.5. Martindale algebras of quotients	14
1.6. The split Cayley algebra	16
1.7. Exercises	17
Chapter 2. General Facts on Lie Algebras	19
2.1. Definitions and examples	19
2.2. Linear Lie algebras	25
2.3. Inner ideals of Lie algebras	30
2.4. Inheritance of primeness by ideals	33
2.5. Solvability and nilpotency	33
2.6. The locally nilpotent radical	35
2.7. A locally nilpotent radical for graded Lie algebras	40
2.8. The locally finite radical	45
2.9. Exercises	48
Chapter 3. Absolute Zero Divisors	51
3.1. Identities involving absolute zero divisors	51
3.2. A theorem on sandwich algebras	53
3.3. Absolute zero divisors generate a locally nilpotent ideal	60
3.4. Nondegenerate Lie algebras	61
3.5. Absolute zero divisors in the Lie algebra of a ring	64
3.6. Absolute zero divisors in Lie algebras of skew-symmetric elements	65
3.7. Exercises	67
Chapter 4. Jordan Elements	69
4.1. Identities involving Jordan elements	69
4.2. Jordan elements and abelian inner ideals	70
4.3. Jordan elements in nondegenerate Lie algebras	71
4.4. Minimal abelian inner ideals	74
4.5. On the existence of Jordan elements	74
4.6. Jordan elements in the Lie algebra of a ring	81

4.7.	Jordan elements in Lie algebras of skew-symmetric elements	83
4.8.	Exercises	85
Chapter 5.	Von Neumann Regular Elements	87
5.1.	Definition, examples, and first results	87
5.2.	Jacobson–Morozov type results	88
5.3.	Idempotents in Lie algebras	92
5.4.	The socle of a nondegenerate Lie algebra	93
5.5.	Principal filtrations	97
5.6.	Exercises	99
Chapter 6.	Extremal Elements	101
6.1.	Definition and properties	101
6.2.	Lie algebras generated by extremal elements	103
6.3.	Jacobson–Morozov revisited	105
6.4.	Simple Lie algebras with extremal elements	106
6.5.	Exercises	110
Chapter 7.	A Characterization of Strong Primeness	113
7.1.	Orthogonality relations of adjoint operators	113
7.2.	A characterization of strong primeness	117
Chapter 8.	From Lie Algebras to Jordan Algebras	119
8.1.	Linear Jordan algebras	119
8.2.	The Jordan algebra attached to a Jordan element	130
8.3.	Extremal elements and finitary Lie algebras	138
8.4.	Clifford elements	140
8.5.	The Kurosh problem for Lie algebras	147
8.6.	Nil Lie algebras of finite width	149
8.7.	Exercises	150
Chapter 9.	The Kostrikin Radical	153
9.1.	Definition y basic results	153
9.2.	Lie algebras with enough Jordan elements	154
9.3.	Lie algebras over a field of characteristic zero	157
9.4.	Kostrikin radical versus Baer radical	160
9.5.	Locally nondegenerate Lie algebras	161
9.6.	Exercises	162
Chapter 10.	Algebraic Lie Algebras and Local Finiteness	165
10.1.	Strongly prime algebraic Lie PI-algebras	165
10.2.	Algebraic Lie algebras of bounded degree	166
10.3.	Exercises	170
Chapter 11.	From Lie Algebras to Jordan Pairs	171
11.1.	Linear Jordan pairs	171
11.2.	From Jordan pairs to Lie algebras	180
11.3.	Finite \mathbb{Z} -gradings and Jordan pairs	184
11.4.	Subquotient with respect to an abelian inner ideal	187
11.5.	Lie notions by the Jordan approach	192
11.6.	Exercises	197

Chapter 12. An Artinian Theory for Lie Algebras	201
12.1. Complemented inner ideals	201
12.2. Lifting idempotents	204
12.3. A construction of gradings of Lie algebras	207
12.4. Complemented Lie algebras	211
12.5. A unified approach to inner ideals	213
12.6. Exercises	215
Chapter 13. Inner Ideal Structure of Lie Algebras	217
13.1. Lie inner ideals of prime rings	217
13.2. Lie inner ideals of prime rings with involution	227
13.3. Point spaces	234
13.4. Inner ideals of rings with involution and minimal one-sided ideals	238
13.5. Inner ideals of the exceptional Lie algebras	245
13.6. Exercises	252
Chapter 14. Classical Infinite-Dimensional Lie Algebras	255
14.1. Simple Lie algebras with a finite \mathbb{Z} -grading	255
14.2. Simple Lie algebras with minimal abelian inner ideals	256
14.3. Simple finitary Lie algebras revisited	258
14.4. Strongly prime Lie algebras with extremal elements	261
14.5. Locally finite Lie algebras with abelian inner ideals	263
14.6. Simple Jordan algebras generated by ad-nilpotent elements	266
14.7. Exercises	266
Chapter 15. Classical Banach–Lie algebras	269
15.1. Primitive Banach–Lie algebras and continuity of isomorphisms	269
15.2. Banach–Lie algebras with extremal elements	272
15.3. Compact elements in Banach–Lie algebras	282
15.4. Exercises	284
Bibliography	285
Index of Notations	293
Index	297
