Preface	vii
Notation	xi
Chapter 1. Completion problems for upper triangular operator matrices	1
1.1. Completions of upper triangular operator matrices to injective and left invertible operator	2
1.2. Completions of upper triangular operator matrices to invertible and right invertible operator	7
1.3. Completions of upper triangular operator matrices to regular operator	13
1.4. Completions of upper triangular operator matrices to Drazin and generalized Drazin invertible operator	19
1.5. Completions of upper triangular operator matrices to Fredholm operator	28
1.6. Completions of upper triangular operator matrices to generalized left and right Weyl operator	36
1.7. Completions of upper triangular operator matrices to Browder operator	44
1.8. Completions of upper triangular matrices to Kato nonsingular operator	52
1.9. Fredholm consistency of upper triangular operator matrices	63
Chapter 2. Invertibility of an operator $A + CX$	75
2.1. Auxiliary results	75
2.2. Invertibility of an operator $A + CX$	77
2.3. Injectivity of an operator $A + CX$	81
2.4. Surjectivity of an operator $A + CX$	84
2.5. Right and left invertibility of an operator $A + CX$	86
2.6. Fredholmness of an operator $A + CX$	88
2.7. Dense range of an operator $A + CX$	93
2.8. Closed range of an operator $A + CX$	95
Chapter 3. Completions of operator matrices $M_X$	101
3.1. Completions of operator matrices $M_X$ to invertible operator	102
3.2. Completions of $M_X$ to injective and nondense range operator	107
3.3. Completions of operator matrices $M_X$ to right and left invertible operator	113
3.4. Completions of operator matrices $M_X$ to semi-Fredholm operator	115
3.5. Completions of operator matrices $M_X$ to Fredholm operator	120
3.6. Completions of operator matrices $M_X$ to closed range operator	122

Chapter 4. Completions of operator matrices $M_{(X,Y)}$	125
4.1. Completions of operator matrices $M_{(X,Y)}$ to invertibility, right and left invertibility	125
4.2. Consistency of operator matrices $M_{(X,Y)}$ in invertibility	128
4.3. Consistency of operator matrices $M_{(X,Y)}$ in Fredholmness	133
Chapter 5. Applications of completion results	139
5.1. Invertibility of linear combinations of operators	139
5.2. Injectivity, right and left invertibility of the sum of two operators	148
5.3. Fredholmness of the sum of two operators	151
Bibliography	159
Index	169
