Preface	ix
Chapter 12. Introduction	1
1. Theorems $\mathcal{C}_7$ and $\mathcal{C}_7^*$	1
Chapter 13. Recognition Theory	9
1. Curtis-Tits Systems and Phan Systems	9
2. The Gilman-Griess Theorem for Groups in $\mathcal{C}_{hev}(2)$	14
3. The Wong-Finkelstein-Solomon Method	15
Chapter 14. Theorem $\mathcal{C}_7^*$ : Stage 4b+. A Large Lie-Type Subgroup $G_0$ for $p = 2$	29
1. Introduction	29
2. A 2-Local Characterization of $L_4^\pm(q)$ , $q$ Odd	33
3. The Case $K \cong L_3^\pm(q)$	39
4. The Case $K \cong G_2(q)$ or ${}^3D_4(q)$	41
5. The Non-Level Case	47
6. The Other Exceptional Cases	58
7. The Case $K \cong PSp_{2n}(q) = C_n(q)^a$	62
8. The $Spin_n(q)$ Cases, $n \geq 7$	74
9. The $Sp_{2n}$ Cases	80
10. The Linear and Unitary Cases	87
11. The Orthogonal Case, Preliminaries	112
12. The Orthogonal Case, Completed	122
13. The Cases in Which $G_0$ is Exceptional	141
14. Summary: $p = 2$	154
Chapter 15. Theorem $\mathcal{C}_7^*$ : Stage 4b+. A Large Lie-Type Subgroup $G_0$ for $p > 2$	155
1. Introduction	155
2. A Choice of $p$	156
3. The Weyl Group	157
4. The Field Automorphism Case	160
5. Some General Lemmas	167
6. The Case $m_p(B) = 4$	178
7. The Case $\text{Aut}_K(B) \cong W(BC_n)$ or $W(F_4)$	187
8. The Case $\text{Aut}_K(B) \cong W(D_n)$ , $n \geq 4$	193
9. Some Exceptional Cases	206
10. The Case $K/Z(K) \cong PSL_m^\pm(q)$	207
11. The Final Case: $K/Z(K) \cong E_6^\epsilon(q)$	219

12. Identification of $G_0$ : Setup	224
13. $G_0 \cong Sp_{2n+2}(q)$ or $A_{n+1}^{-\epsilon_q}(q)$	225
14. $G_0 \cong D_{n+1}^{\pm}(q)$	232
15. $G_0 \cong L_k^{\epsilon_q}(q)$	248
16. $G_0 \cong E_8(q)$	252
17. $G_0 \cong E_6^{\epsilon_q}(q)$ and $E_7(q)$	257
18. The Remaining Cases for $G_0$	264
19. $\Gamma_{D,1}(G)$ Normalizes $G_0$	277
Chapter 16. Theorem $\mathcal{C}_7^*$ : Stage 5+. $G = G_0$	291
1. Introduction and Generalities	291
2. The Alternating Case	293
3. The Lie Type Case, $p = 2$ : Part 1	294
4. The Lie Type Case, $p = 2$ : Part 2	298
5. The Lie Type Case, $p > 2$	303
Chapter 17. Preliminary Properties of $\mathcal{K}$ -Groups	321
1. Weyl Groups and Their Representations	321
2. Toral Subgroups	335
3. Neighborhoods	355
4. CTP-Systems	376
5. Representations	383
6. Computations in Groups of Lie Type	387
7. Outer Automorphisms, Covering Groups, and Envelopes	406
8. $p$ -Structure of Quasisimple $\mathcal{K}$ -groups	408
9. Generation	415
10. Pumpups	423
11. Small Groups	455
12. Subcomponents	464
13. Acceptable Subterminal Pairs	470
14. Fusion	474
15. Balance and Signalizers	480
16. Miscellaneous	481
Bibliography	485
Index	487
