Preface	ix
Chapter 1. Diagrams of Knotted Surfaces	1
1.1. Classical knot diagrams	1
1.2. Knotted surface diagrams	2
1.3. Reidemeister moves of classical knots	12
1.4. Movies of knotted surfaces	14
1.5. Charts of knotted surfaces	18
1.6. Examples: how to draw charts and decker curves	20
1.7. Symbolic presentations of classical knots	33
1.8. Sentences of knotted surfaces	34
1.9. Other diagrammatic methods	38
Chapter 2. Moving Knotted Surfaces	41
2.1. Equivalence of knotted surfaces	41
2.2. Roseman moves	42
2.3. Movie moves	44
2.4. Chart moves	52
2.5. The grammar of knotted surfaces	75
2.6. Singularities of knotted surface isotopies	78
2.7. Coffee break	88
Chapter 3. Braid Theory in Dimension Four	97
3.1. Classical braid theory	97
3.2. Surface braids	99
3.3. Charts of surface braids	100
3.4. Braid movies	116
3.5. Moves for charts and braid movies	117
3.6. Homotopy interpretations	123
Chapter 4. Combinatorics of Knotted Surface Diagrams	131
4.1. Orientations of the double and triple decker set	131
4.2. Surfaces in 3-space that do not lift	133
4.3. Smoothing triple points	145
4.4. Normal Euler numbers and branch points	148
4.5. Formulas for colored triple points	161
4.6. Some combinatorics of charts and sentences	166
Chapter 5. The Fundamental Group and the Seifert Algorithm	169
5.1. Wirtinger presentations for classical knots	169
5.2. Wirtinger presentations for knotted surfaces	171

5.3. The Alexander module	181
5.4. A Seifert algorithm for knotted surfaces	188
Chapter 6. Algebraic Structures Related to Knotted Surface Diagrams	203
6.1. Generalizations of the Yang-Baxter equation	203
6.2. Category theory of knotted surfaces	214
6.3. Conclusion	241
Bibliography	243
Index	257
