<b>Preface</b>	<b>xi</b>
<b>0 Preparation for College Calculus</b>	<b>1</b>
0.1 Limits, continuity, and the derivative .....	1
0.2 The integral and integration .....	4
0.3 Further review .....	8
<b>1 Volume Integrals and Integration by Parts</b>	<b>11</b>
1.1 The cylindrical shell technique.....	11
1.2 Integration by parts .....	18
1.3 The volume of a solid with computable cross-sectional areas .....	24
1.4 Explorations.....	32
1.5 Acknowledgments .....	37
<b>2 Arc Length, Trigonometric Substitution, and Surface Area</b>	<b>39</b>
2.1 Arc length.....	39
2.2 Trigonometric substitutions.....	45
2.3 Applications of trigonometric substitutions.....	50
2.4 Area of a surface of revolution.....	54
2.5 Explorations.....	59
2.6 Acknowledgments .....	63
<b>3 Differential Equations</b>	<b>65</b>
3.1 Examples of differential equations.....	66
3.2 Slope fields.....	71
3.3 Euler's method.....	76
3.4 Separation of variables.....	78
3.5 First-order linear equations .....	83
3.6 Explorations.....	86
3.7 Acknowledgments .....	90

<b>4</b>	<b>Logistic Model, Partial Fractions, Least Squares</b>	<b>91</b>
4.1	The logistic model for the population of the United States .....	91
4.2	Integration by partial fractions .....	99
4.3	Substitutions to rationalize the integrand .....	106
4.4	The least squares equations .....	108
4.5	Explorations .....	111
4.6	Acknowledgments .....	114
<b>5</b>	<b>Physical Applications of Integration</b>	<b>115</b>
5.1	Work .....	115
5.2	Mass and centers of mass .....	123
5.3	Fluid force .....	128
5.4	Explorations .....	133
<b>6</b>	<b>The Hyperbolic Functions</b>	<b>137</b>
6.1	The six hyperbolic functions .....	137
6.2	The inverse hyperbolic functions .....	142
6.3	Relationships among circular and hyperbolic functions .....	144
6.4	Explorations .....	147
6.5	Acknowledgments .....	150
<b>7</b>	<b>Numerical Integration</b>	<b>151</b>
7.1	A review of methods from your PCE .....	151
7.2	Simpson's rule .....	160
7.3	Explorations .....	166
7.4	Acknowledgments .....	173
<b>8</b>	<b>Parametric Equations and Polar Coordinates</b>	<b>175</b>
8.1	Parametric equations and parametric curves .....	175
8.2	Parametrized motion and arc length .....	187
8.3	Polar coordinates .....	193
8.4	Explorations .....	203
<b>9</b>	<b>Improper Integrals, L'Hôpital's Rule, and Probability</b>	<b>211</b>
9.1	Type I improper integrals .....	212
9.2	L'Hôpital's rule for quotients and products .....	218
9.3	Type II improper integrals .....	224
9.4	L'Hôpital's rule for differences and powers .....	231
9.5	Continuous probability models .....	234
9.6	Explorations .....	240
9.7	Acknowledgments .....	243
<b>10</b>	<b>Infinite Series (Part I)</b>	<b>245</b>
10.1	An introduction to series and sequences .....	245
10.2	Geometric and telescoping series .....	255

10.3 Monotone sequences .....	261
10.4 The integral test: series and improper integrals .....	264
10.5 Comparison tests for positive term series.....	270
10.6 The alternating series test .....	273
10.7 Explorations.....	278
10.8 Acknowledgments .....	281
<b>11 Infinite Series (Part II)</b> .....	<b>283</b>
11.1 Absolute and conditional convergence.....	283
11.2 The ratio and root tests.....	286
11.3 Convergence tests: a summary and strategy.....	291
11.4 Power series .....	292
11.5 The calculus of power series.....	297
11.6 Taylor and Maclaurin series.....	305
11.7 Binomial series.....	313
11.8 Explorations.....	319
11.9 Acknowledgments .....	323
<b>Appendix A A Description of the AP Calculus AB Course</b> .....	<b>325</b>
<b>Appendix B Useful Formulas from Geometry and Trigonometry</b> .....	<b>329</b>
B.1 Geometric formulas .....	329
B.2 Trigonometric formulas.....	330
<b>Appendix C Supplemental Topics in Single Variable Calculus</b> .....	<b>333</b>
C.1 Newton's method.....	333
C.2 Mathematical induction.....	339
<b>Appendix D Supplemental Explorations</b> .....	<b>345</b>
D.1 The Wallis product for $\pi/2$ .....	345
D.2 The Euler-Mascheroni constant.....	345
D.3 The Euler-Mascheroni constant, continued .....	347
D.4 Stirling's formula.....	348
D.5 Newton's approximation of $\pi$ .....	349
D.6 Estimating a value of a function from its derivatives.....	350
D.7 Acknowledgments .....	351
<b>Appendix E Answers to Odd-Numbered Exercises</b> .....	<b>353</b>
<b>Index</b> .....	<b>367</b>
